The Completion of 30 Great Cycle Orbits – Part II

The Lighted Ages of the Minor Cycle Orbit

Standing at the Precipice of Change

In “*The Completion of 30 Great Cycle Orbits*” we revealed that our solar sun has completed its 30th orbit around the Milky Way Galaxy, also known as Orvonton in *The Urantia Book*. Only in *The Urantia Book* can be found such dates reflected in the patterns of time, that every 51+ million years, at 90 and 45 degree intervals from the tips of the compass-cross of the *Great Cycle Orbit*, the solar system enters an energetic cosmic cloud that initiates periods of massive global change causing evolutionary leaps forward, global cataclysms, extinction events, and continental reconfigurations. With the start of Orbit #31 of the *Great Cycle Orbit* we stand at the precipice of change, ready or not.

The last time Earth experienced *Great Cycle Orbit* changes was over 51 million years ago, marked by the “sudden” appearance of mammals around the time of the great asteroid known to have struck the coast of Yucatán, Mexico. We now know this extinction event to be corrected from 65.5 to just over 51 million years ago by the fact that radiometric isotopic decay has decreased over time since the implantation of life; a little-known fact that has caused the science community to incorrectly date events of the far distant past. We thank Dr. Chris Halvorson at www.perfectinghorizons.org for his work in that area and for his astute knowledge and understanding of *The Urantia Book*.

The shorter cycles of the *Minor Cycle Orbit* have also affected the planet over time to bring progressive evolutionary progress, racial improvement, re-seeding, and scientific discovery along with higher states of consciousness. We have cycled through an untold number of civilizations since the appearance of *modern* mammals 30 million years ago when ancient Lemurs appeared – the ancestors of mankind.

We are going to take a closer look at the *Minor Cycle Orbit* of 25,860 years to show how evolution progressed during the *Lighted* periods of that cycle. The Solar System also enters an energetic cloud twice in the orbit around its mother star Alcyone. Every 10,775 years in fact, for a period of 2,155 years in its 12,930 year half-cycle. When did these periods happen? Where can we look to find the proof that such periods even existed or are upon us now? What can we expect to happen?

Does Science Know?

NASA and other scientists now know of the existence of these approaching cosmic energy clouds – our “being in the energies”. The first step in knowing of something is to be aware of its existence. Science has discovered a strong magnetic field just outside our solar system that they cannot explain. They are calling it the “Local Interstellar Cloud” – “Local Fluff” for short. They say the Local Fluff is actually pressing up against our solar system, allowing cosmic rays to reach the inner part of it. While claiming to have “solved a mystery” they admit that “*The solar system is passing through an interstellar cloud that physics says should not exist*”. There are many reports of local clouds and bubbles but none seem to offer any satisfaction simple enough to satisfy common sense curiosity.

The Urantia Book contains information to help confirm if something as special as predetermined energy cloud-passings actually occurred. These would be times where one could identify the transforming of DNA, upgrading of species and intellect, higher expanded realities, and most importantly, attaining a higher plateau of spiritual insight – there would be an account of history to reflect this. These are the things in *Lighted* times that ignite social and cultural reform and advancement; the *causation* of unexplainable *sudden* leaps forward.

The Completion of 30 Great Cycle Orbits – Part II

The Lighted Ages of the Minor Cycle Orbit

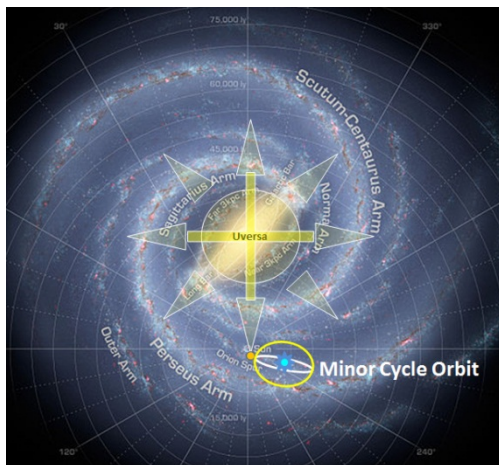

It is not a time to fear these external cosmic events upon us now. This is the time to welcome the opportunity for advancement in the march of progress. The effects of these energies will most certainly cause major Earth changes that *must happen*. Civilizations, like gardens, are cyclically “mulched” to accommodate the evolution of life. It’s inevitable. In *Lighted* times a renewed, higher awareness brings increased consciousness and spiritual intelligence, for spiritual progress has purpose in the *Divine Plan*.

To understand the cause, source, and effects of cosmic cycles is to understand how they are governed, managed and initiated. We are being made aware of these facts in this present time so that we will have the opportunity to cooperate and grow upward in the evolutionary spiral.

As the energies from the *Great Cycle Orbit* and *Minor Cycle Orbit* align together to set the stage for the big events to occur, one might ask: How do the lesser-cycle periods of the *Minor Cycle Orbit* differ from being in the energies of the *Great Cycle Orbit*?

Cycles of Energy within the Sands of Time

Both the *Minor Cycle Orbit* and the *Great Cycle Orbit* have different intervals of their respective energy patterns, frequency of occurrence, and point of nearest emanation. They occur as two separate cycles, one immensely longer than the other and they are converging together now, their energies combining.

The *Great Cycle Orbit* of 205.5 million years has an energy pattern that emanates from galactic center – the Power Centers of Uversa (UB 29:2) – in the form of a cross with midpoints in-between; thus we reach it four times or every 51+ million years in the long orbit around the Milky Way. The *Great Cycle Orbit* energy pattern forms an eight-pointed star where the energy points intersect the orbit circle as cosmic clouds of high energy. The ancients referred to this eight-point star as “the eight roads to heaven”. Perhaps they were aware of what we are only (re)discovering today as we turn to begin orbit #31 and await the biggest evolutionary event in the history of mankind.

29:2.15. “Such specialized currents of time and space are definite and localized energy movements initiated and directed for specific purposes, much as the Gulf Stream functions as a circumscribed phenomenon in the midst of the Atlantic Ocean.”

By this statement above you can think of the *Minor Cycle Orbit* – our localized orbit – as a whirling gulf stream within the greater ocean of Orvonton.

The *Minor Cycle Orbit* of 25,860 years has an energy pattern that also emanates from galactic center but acts through our mother star Alcyone. Alcyone keeps our Sun in its orbital gravitational influence for the seven sisters of Pleiades collectively exert such the pull that is necessary to hold our solar system in its orbit. It also emits a high frequency energetic cloud-band in the form of a circular ring that we reach every 10,775 years when we begin again, to be in *Lighted* energies for 2,155 years before moving on away from such *Lighted* times to reach it again, 10,775 years later.

The Lighted Ages of the Minor Cycle Orbit

This is the reason so many ancient civilizations kept detailed zodiacal calendars that tracked the positions of the constellations; they knew that one day *The Return of Light* would come again!

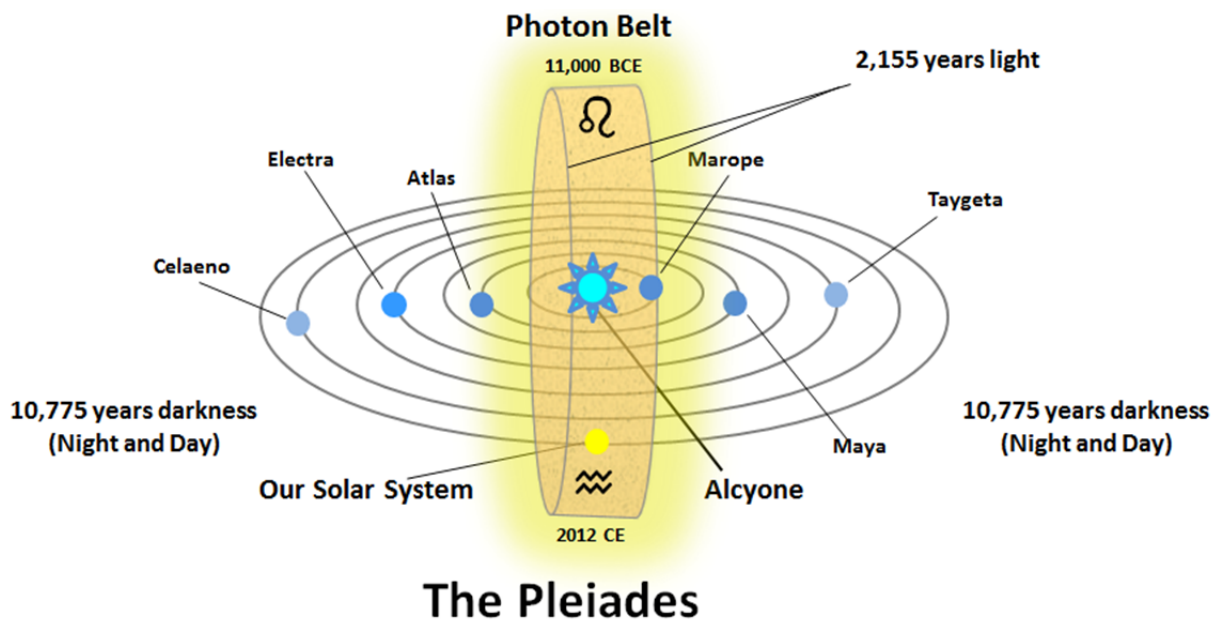

This *Lighted* energy stream within the *Minor Cycle Orbit* goes by many names: *Photon Belt*, *Photon Ring*, *Golden Radiation*, and *Manasic Ring* to name a few. It intersects at an angle to the ecliptic plane of our solar system orbit such that we enter that golden radiation cosmic energy cloud band of very intense, high-frequency invisible light only twice during our 25,860 year orbit, at opposite points in the cycle, during the astrological ages of Leo and Aquarius. “Light” is not always visible. In fact, light is never visible or invisible – you can only see the reflection or effect of light and “perceive” it to be visible.

Recent discoveries prove The Great Giza Pyramid was, among many things, a giant recording of the last time we were in those energies during the Age of Leo 13,000 years ago (11,000 BCE). If one wanted to stress the importance of such *Lighted* times of both higher consciousness and catastrophic destruction, building such a monument – a feat unattainable since – would certainly be a good way to get a message across the sands of time. In any case, people still want more proof and that is the purpose of this paper. There IS more proof and lots of it in fact. Get past the memes; this is real. Welcome to *Lighted* times.

As we move through space-time, the apparent backward (retrograde) movement of each zodiacal constellation e.g., Taurus/bull, Aries/ram, Pisces/fish, etc. falls back one degree in nearly every 72 years. While this Precession of the Equinox is oft-cited as the effect of the tilting of the Earth’s axis, it is our *changing position* within the *Minor Cycle Orbit* along the path of the *Great Cycle Orbit* around the Milky Way that is the real deal at hand. Let the Earth-Wobble theory go to those still half-asleep. Awaken and see for yourself; we are coming in to it *now* as your higher senses come alive to confirm the truth.

Thus every 10,775 years we are “in the light” for a period of 2,155 years, then another 10,775 years goes by, another 2,155 years “in the light” and we arrive back to the same view of the heavens after a full orbit-cycle of 25,860 years. We see in the heavens today, the same view of the sky seen in 24,000 BCE.

The following diagram of the *Minor Cycle Orbit* helps to illustrate how we move through the cycle of these energies.

The Lighted Ages of the Minor Cycle Orbit

A Correlation Study of the Divine Plan – Part II

The “effects” of the influences of each *Minor Cycle Orbit Age* show up upon the Earth acting as a mosaic on each civilization. We call them Zodiacal or Astro-“logical” ages. During the ages of Leo and Aquarius we are in the higher *Lighted* energies of the *Minor Cycle Orbit* twice during the 12 zodiacal ages, a period of 2,155 years each every 10,775 years. Knowledge of being in these *Lighted* energy streams has long faded from memory giving birth to folklore and myth of so-called golden ages. They indeed happened although not always in such tropical-meme-like settings. Mainstream science has for years failed to validate this orbit-cycle for it is of higher-realm etheric frequency; only recently have they adopted “Ether” as the fifth element now seen in plasma science and the electric universe.

Many of the big events of the last 35 million years of Earth history are reflected in these two important *Lighted* ages. Many who explain the last *Lighted* Age of Leo from approximately 11,000 to 8,800 BCE often point out the incredible happenings of that time: massive Earth changes, continental sinkings, deglaciation and the high culture of Egypt including the building of the Great Pyramids to name but a few. One golden age however, does not do much to prove the existence of being in the energies of The *Minor Cycle Orbit*. We need a dozen or so examples to convince doubters and detractors of such times.

The cycle of history repeats itself. *Now* is the time to *know* how the events in other such times affected humanity. The following five excerpts from *The Urantia Book* help to illustrate some of the effects these *Lighted* times have on humanity’s consciousness, awareness, and spiritual enlightenment:

41:2.5.Life has inherent capacity for the mobilization and transmutation of universal energy.

32:5.5.The sectors of time are like the flashes of personality in temporal form; they appear for a season, and then they are lost to human sight, only to reappear as new actors and continuing factors in the higher life of the endless swing around the eternal circle. Eternity can hardly be conceived as a straightaway drive, in view of our belief in a delimited universe moving over a vast, elongated circle around the central dwelling place of the Universal Father.

65:8.6.When physical conditions are ripe, *sudden* mental evolutions may take place; when mind status is propitious, *sudden* spiritual transformations may occur; when spiritual values receive proper recognition, then cosmic meanings become discernible, and increasingly the personality is released from the handicaps of time and delivered from the limitations of space.

114:6.5. *The epochal angels.* These are the angels of the current age, the dispensational group. These celestial ministers are intrusted with the oversight and direction of the affairs of each generation as they are designed to fit into the mosaic of the age in which they occur. The present corps of epochal angels serving on Urantia is the third group assigned to the planet during the current dispensation.

12:6.4.In all your contemplation of universal phenomena, make certain that you take into consideration the interrelation of physical, intellectual, and spiritual energies, and that due allowance is made for the unexpected phenomena attendant upon their unification by personality and for the unpredictable phenomena resulting from the actions and reactions of experiential Deity and the Absolutes.

The Lighted Ages of the Minor Cycle Orbit

The “Lighted Ages” – Times of Evolutionary Progress & Spiritual Enlightenment

Myths can only give hints of truth; *real* history – the times during which they occurred – is a fact of truth. The most recent *Lighted* Age of Leo was from 10,993 to 8,838 BCE. Do the math, it is simple: start from 1937 and subtract 2,155 years for each Age. By extending the ages back thru time align the ages to show Leo and Aquarius periods. The grouping of each beginning age-period will show where to place historical events. The following table lists over 250 zodiacal precessional ages back to 500,000 BCE:

Historians largely ignore the most recent *Lighted* age, taking instead “The Dawn of Civilization” to start around 8,000 BCE. Using 11 historical dates from *The Urantia Book*, Part III – *The History of Urantia*, the following table summarizes a sample of 12 historical events correlated to the ages of Leo and Aquarius to demonstrate by example, when we were in such extraordinary “Lighted” times.

Planetary Mortal Epochs: The Mosaic Stage of the Lighted Ages

52:0.1.FROM the inception of life on an evolutionary planet to the time of its final flowering in the era of light and life, there appear upon the stage of world action at least seven epochs of human life. These successive ages are determined by the planetary missions of the divine Sons, and on an average inhabited world these epochs appear in the following order:

1. **52:0.2.1. Pre-Planetary Prince Man.**
2. **52:0.3.2. Post-Planetary Prince Man.**
3. **52:0.4.3. Post-Adamic Man.**
4. 52:0.5.4. Post-Magisterial Son Man.
5. 52:0.6.5. Post-Bestowal Son Man.
6. 52:0.7.6. Post-Teacher Son Man.
7. 52:0.8.7. The Era of Light and Life.

It is both remarkably interesting and confirming verification to find that Earth experienced the first three Planetary Mortal Epochs during the times when the ages were in *Lighted* times of either Leo or Aquarius. Here are some additional extracts from *The Urantia Book* illustrating what happened in these times.

The Lighted Ages of the Minor Cycle Orbit

Pre-Planetary Prince Mankind in the Lighted Age of Aquarius

Age Began	Main Event	Age Ended	Evolutionary Events	Source
982,898	981,389	980,743	Onagar first Truth Teacher, first missionaries; high spiritual civilization lasting 80,000 years; efficient tribal government.	63:6.8 64:2.1

- 52:1.1. From the time of man's emergence from the animal level—when he can choose to worship the Creator — to the arrival of the Planetary Prince, mortal will creatures are called *primitive men*.
- 63:6.1 Onagar assumed the leadership of these tribes, brought peace among them, and for the first time, led all of them in the worship of the "Breath Giver to men and animals."
- 63:6.8 Never again, until the arrival of the Planetary Prince, was there such a high spiritual civilization on earth.
- 63:6.9 it was not until the days of Onagar that the Adjusters and guardian seraphim came in great numbers to Urantia.

Post-Planetary Prince Mankind in the Lighted Age of Leo

Age Began	Event Year	Age Ended	Evolutionary Events	Source
502,333	500,000	500,178	Caligastia +Staff arrival; Caligastia 100; Era of Dalamatia; Planetary Progress; Primary Midwayers; 6 Sangik Races appear	66:0.2 77.1

- 49:5.23 the inauguration of human civilization and a focalized human society
- 50:4.1 the culture of Dalamatia, established in Mesopotamia, including Law of Dalamatia teachings
- 52:2.1. with the arrival of the Planetary Prince a new dispensation begins. Government appears on earth, and the advanced tribal epoch is attained. Great social strides are made during a few thousand years of this regime. ... Mortals attain a high state of civilization during this age.
- 52:2.4. this dispensation witnesses a spiritual dawn
- 52:1.6 duly elected survivors from Pre-Planetary Prince epoch are adjudicated by the archangels for subsequent resurrection and Spirit fusion. They do this on the Planetary Prince's arrival.
- 61:7.4 the six Sangik *Races* accelerated the development of human evolution.
- 66:0.2 the arrival of the Planetary Prince and his staff including the Caligastia 100
- 66:0.2 a world population of 500 million on Earth scattered across Europe, Asia, and Africa
- 66:2.7 the 100 modified human donors with the potential of immortality
- 66:6.6 They ... did markedly accelerate its normal and natural evolution.
- 77:1.4 the appearance of the Primary Midwayers – the teachers of society

Post-Planetary Prince Mankind in the Lighted Age of Aquarius

Age Began	Event Year	Age Ended	Evolutionary Events	Source

10,993	Various	8,838	Racial distributions and extensive climatic changes; Origin of Greeks & Dravidian Indian races; Epoch-making racial mixtures (Also the sinking of Atlantis, Giza Pyramids, Massive Flooding)	78-80

- 52:3.1 when primitive man has ascended as far as possible in the biologic scale, a Material Son and Daughter always appear on the planet
- 73:0-7 The Garden of Eden was a fact
- 74:0.1 The arrival of Material Son and Daughter, Adam and Eve bringing the violet DNA
- 51:6.3-4 A planetary university of culture, philosophy, religion, morals, higher intellect and art
- 77:5.5 Adamson and Ratta parent 67 children and grandparent the Secondary Midwayers
- 78:0.1 The Second Garden – The cradle of civilization for almost 30,000 years
- 77:5.9 The Adamsonites, a high culture for 7,000 years, included among the “mighty men of old”
- 80:3.1-7 The appearance of the Cro-Magnoid Blue Man 35,000 years ago
- 61:7.18 The termination of the great ice age beginning the Holocene postglacial period
- 79:2.6 Andites had become submerged by 10,000 B.C., but the whole mass of the (Dravidian) people had been markedly improved by this absorption.

Post-Adamic Mankind in the Lighted Age of Aquarius

Age Began	Main Event	Age Ended	Evolutionary Events	Source
23,923	23,000	21,768	The earliest Andite peoples took origin in Turkestan, adjacent to Mesopotamia, a blending of Adamites and Nodites	78:4-5

- 78:4.3. The Andites were the best all-round human stock to appear on Urantia since the days of the pure-line violet peoples.
- 78:5.5. The Andites not only migrated to Europe but to northern China and India, while many groups penetrated to the ends of the earth as missionaries, teachers, and traders.
- 78:5.6. These Andites were the so-called Dravidian and later Aryan conquerors of India; and their presence in central Asia greatly upstepped the ancestors of the Turanians. Many of this race journeyed to China by way of both Sinkiang and Tibet and added desirable qualities to the later Chinese stocks.
- 78:5.7. One hundred and thirty-two of this race, embarking in a fleet of small boats from Japan, eventually reached South America and by intermarriage with the natives of the Andes established the ancestry of the later rulers of the Incas.

The Lighted Ages of the Minor Cycle Orbit

Subsequent Planetary Mortal Epochs and the Promise of Return

From the start, Planet Earth followed an unusual course in the Planetary Mortal Epoch process. The planet suffered many misfortunes (the default of Planetary Prince Caligastia with the Lucifer Rebellion and the default of Material Son and Daughter, Adam and Eve) that have continued to delay and derail the completion of the remaining Planetary Mortal Epochs. Epochs #4 and #5 were brief periods and occurred in the two previous ages to the current *Lighted* age period. Further discussion on these remaining Epochs is beyond the scope of this paper and will thus be reserved for another time. For now, ponder the following carefully selected quotes from *The Urantia Book*:

51:3.9>Your world has been visited by four orders of sonship: Caligastia, the Planetary Prince; Adam and Eve of the Material Sons of God; Machiventa Melchizedek, the "sage of Salem" in the days of Abraham; and Christ Michael, who came as the Paradise bestowal Son.

52:7.1.Again we find Urantia out of step with its sister spheres in that your Jesus has promised to return. That promise he will certainly fulfill, but no one knows whether his second coming will precede or follow the appearances of Magisterial or Teacher Sons on Urantia.

176:4.6.You would do well, therefore, to disassociate the Master's personal return to earth from any and all set events or settled epochs. We are sure of only one thing: He has promised to come back. We have no idea as to when he will fulfill this promise or in what connection.

37:3.4.Do you grasp the significance of the fact that your lowly and confused planet has become a divisional headquarters for the universe administration and direction of certain archangel activities having to do with the Paradise ascension scheme? This undoubtedly presages the future concentration of other ascendant activities on the bestowal world of Michael and lends a tremendous and solemn import to the Master's personal promise, "I will come again."

20:4.5.Regardless of the misunderstandings about the Urantian sojourn of Michael of Nebadon, one thing is certainly authentic—his promise to come back to your world. In view of this prospect, only time can reveal the future order of the visitations of the Paradise Sons of God on Urantia.

93:10.8.And all these speculations associated with the certainty of future appearances of both Magisterial and Trinity Teacher Sons, in conjunction with the explicit promise of the Creator Son to return sometime, make Urantia a planet of future uncertainty and render it one of the most interesting and intriguing spheres in all the universe of Nebadon. It is altogether possible that, in some future age when Urantia is approaching the era of light and life, after the affairs of the Lucifer rebellion and the Caligastia secession have been finally adjudicated, we may witness the presence on Urantia, simultaneously, of Machiventa, Adam, Eve, and Christ Michael, as well as either a Magisterial Son or even Trinity Teacher Sons.

170:4.15.Although Jesus referred one phase of the kingdom to the future and did, on numerous occasions, intimate that such an event might appear as a part of a world crisis; and though he did likewise most certainly, on several occasions, definitely promise sometime to return to Urantia, it should be recorded that he never positively linked these two ideas together. He promised a new revelation of the kingdom on earth and at some future time; he also promised sometime to come back to this world in person; but he did not say that these two events were synonymous. From all we know these promises may, or may not, refer to the same event.

The Lighted Ages of the Minor Cycle Orbit

Summary: Purposeful Cycles in the Divine Plan

The purpose of putting to print these writings on coming event(s) is so you know things are happening *now*. People need to *look* past science, to *see* the reality of the heavens in action and *know* that the universe IS managed and the many cycles coming together now ARE part of the *Divine Plan*. A dozen examples of past ages when Earth was in the Lighted energies were given. Perhaps you have doubts; maybe you believe today is just another day. If so, may you come into knowing soon for time grows short and evolution has already begun to happen – again.

These periodic cycles of approaching and departing energetic plasma clouds of *Lighted* energy have purpose in the managed Creation in which we exist; they initiate necessary change, they force turning points on some grand schedule of time ever moving forward the evolution of planets, stars, and universes toward an eventual, destined purpose. When big evolution “*suddenly*” happens, the solar system, our planet Earth, will always be found in or near one of these energetic clouds, when the Creation steps in to manage purposeful progress. Evolution is never a random freak occurrence. History proves that fact and we are now at that precipice again, at that “*suddenly*” point in time, the largest of changes – the beginning of a Grand Cycle *and* a Minor Cycle – the biggest evolutionary event in the history of mankind.

Thank you for taking the time in the reading of this paper. May you shine in these *Lighted* times.
