well so far I don't see a thread, I thought there was one, but it's a trash thread on stuff dissolving into cubes. So here we go. Go to Stereo, Click on the Green stereo AHEAD images starting at 4:05 UTC WOW, we have never seen so many, and I did know they were going to work on the sun early yesterday, and last evening Esu told me to check Stereo, but at the time there were no images yet on the new UTC day and nothing on the old ones.

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov) Click on the Stereo Ahead Green EUVI on the right, select 1024 which produces the list, then click on thumbnails and click on the first one, 4:05 UTC and all the rest for hours!

Enlarge again if you wish. Selecting the highest resolution does not make it larger.

Hmmm...if you click on the first one (4:05) and look at the right side, about mid-point of the sun and zoom, it looks like a face. It's interesting to say the least. Wonder what it is.

Quoting: **Anonymous Coward 1277722**

I don't know about the face, look all around the sun in space, that is where the craft are, and perhaps on the face in some of the images, there are black spots if you look at several of them.

Well I went there but I freely admit I have no idea what they are talking about.

They are preparing the sun by increasing it's vibrations to work with the incoming WAVE that is bubbling up from the core now, which is probably part of the reason a lot of people are feeling more gentle rumblings.

yesterday they also "vented" the sun a bit out the back, you can see the CME's on Stereo A and B, the red image. These are not earth facing. They have been doing this so we have a bit more time, it is them that have kept the sun in a MIN for so long now.

Esu told me earlier yesterday they would be working on the sun again. Then last evening he told me to check stereo, and there were no new images yet so I went to bed. I forgot completely this morning and then somebody on my forum sent me a note and I put it up on my site and called a few friends that would enjoy knowing. I checked here several times and didn't see any threads, I thought somebody else would have started several already.

Are YOU Stupid?, these craft are from HEAVEN quite literally. They are Orvonton **government** craft (milky way). These are thus from "God" and they create and maintain the creation. Our sun is in the photon belt, stuff is going to happen regardless, and we are for 4 1/2 years now in the energies coming from the center of the Milky Way, we are at the end of the allotted 550 millions years for evolution on this planet, and this is area is ascending into higher vibration. That is WHY they are here, that is WHY the visit by God himself 2000 years ago who is also returned. This is an important time for man, and you can act stupid, or you see observe the WONDER. Which will it be?

you people are stupid . You are happy about a huge objects around your only source of light for life? You cant stop them if they want to kill you by killing your star.

Quoting: **Anonymous Coward 1267719**

Are YOU Stupid?, these craft are from HEAVEN quite literally. They are Orvonton **government** craft (milky way). These are thus from "God" and they create and maintain the creation. Our sun is in the photon belt, stuff is going to happen regardless, and we are for 4 1/2 years now in the energies coming from the center of the Milky Way, we are at the end of the allotted 550 millions years for evolution on this planet, and this is area is ascending into higher vibration. That is WHY they are here, that is WHY the visit by God himself 2000 years ago who is also returned. This is an important time for man, and you can act stupid, or you see observe the WONDER. Which will it be?

Quoting: **Nobody in Particular**

You speak in strange words friend.

What means Orvotron?

Quoting: **Anonymous Coward 1299268**

Orvonton is one of 7 superuniverses. The Milky Way Galaxy is the core Galaxy but it's much larger than the Milky Way. Each superuniverse has up to 100,000 universes with in. Each universe is a aggregation of suns fromed from one or more Nebulas. Every Nebula you see on the Hubble is a

potential universe. Universes form constantly and there is government over them. The universe we belong too is Nebadon, and JESUS is "God" or Creator Son of Nebadon. We are a special planet for many reasons, and he did visit 2000 years ago and has returned.

Heaven is a collected of special worlds that are custom made. There is both living, schools, and government. These are the worlds you live on when you have graduated as a young soul from evolutionary planets like this one. These higher worlds are where you live your eternal life of trillions of years.

When new nebulas are turning into universes, these custom worlds of living and government are built and even a world the size of earth, can take 1 million years to build. The headquarters planets of Nebadon, a large main sphere 100 times the size of earth, and it's surrounding smaller ones, took 1 billion years to build. Our headquarters world is called Salvington.

I would suggest going to this gallery of Paintings, [[link to antifan-real.deviantart.com](http://link.to.antifan-real.deviantart.com)] The artist has a LOT of memories.

[[link to antifan-real.deviantart.com](http://link.to.antifan-real.deviantart.com)] shows the building of these special worlds of "heaven" in a New Born Nebula.

Orvonton, our superuniverse, has an even larger headquarters area of spheres. It is called Uversa. Uversa houses the government of the entire superuniverse and is over all the smaller "local" universes, like ours.

Because of the special situations in our area, we have the "big wigs" here.

well so far I don't see a thread, I thought there was one, but it's a trash thread on stuff dissolving into cubes. So here we go. Go to Stereo, Click on the Green stereo AHEAD images starting at 4:05 UTC WOW, we have never seen so many, and I did know they were going to work on the sun early yesterday, and last evening Esu told me to check Stereo, but at the time there were no images yet on the new UTC day and nothing on the old ones.

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov) Click on the Stereo Ahead Green EUVI on the right, select 1024 which produces the list, then click on thumbnails and click on the first one, 4:05 UTC and all the rest for hours!

Enlarge again if you wish. Selecting the highest resolution does not make it larger.  
Quoting: **Nobody in Particular**

These are just compression artifacts.

those are micro-particles on the lens

anything that close to the sun would instantly incinerate in a flash

Quoting: **Stu**

I put one into PS and did a littl playing.

Those are not particles on the lens.

If they were then there would be not enhanced glow around them.

One of the objects looks like that huge object reported by Bob Dean. long 2000 mile cylinder.

It is a shame we cannot get a closer look.

Since our knowlege of physics is limited to what we have learned here on earth, I doubt we know much.

I am certain of one thing, we have a lot more to learn.

Especially about solar thermodynamics and technology to neutralize it.

Quoting: **RARisingSon**

They are working on the sun, no invasion. They have already sent any negative ones with craft out of this solar system. They have removed the reptilians that lived under the surface and their negative little greys.

This is the ascension of this solar system and that is larger reason they are here and why the leader of our universe visited 2000 years ago.

it does not spit chunks out in this manner. It spits them out as CME's and the sun does not have a whole ring of CME's around it right now.

I have watched it for some time now, and these are not regular unless star fleet is working there. I was informed they were and thus since nobody else did, I put up the thread.

Quoting: **Anonymous Coward 1258758**

SOHO has the bake outs, not stereo as far as I know, and if they were drops of WATER or other liquid , something is WRONG, these satellites are 1 million miles out.

they shut them down for some other reason, probably to go in earth russian craft to clean them maybe, NOT WATER. That is a big lie they have put out to cover up something else, maybe some other type of maintenance, but again, that is SOHO, at the link and Stereo satellites were constructed differently.

And if this was condensation of a liquid it would be on all the images and not just a few over a few hours.

People need to stop taking the blue pills and start take the red pill and looding at the WHAT IS.

Quoting: **Nobody in Particular**

What's funny is that it's hard to tell if you're serious.

But please, you gotta tell me one thing:

When they speak to you, what do they sound like?

Quoting: **Karbunkle**

It is MENTAL stuff, there is NO sound. They all have different personalities and this comes across the same as differences in talking with people over the telephone. Mind to mind talk IS the NORM on most worlds and has been on this one before. I was simply born that way, as to the ability, done it my whole life.

Mental energy can carry light years away. I have spoken with ones in Havona before which is the central universe. Universe channels are not yet understood. but most of the ones I chat with are located in or near our solar system.

well so far I don't see a thread, I thought there was one, but it's a trash thread on stuff dissolving into cubes. So here we go. Go to Stereo, Click on the Green stereo AHEAD images starting at 4:05 UTC WOW, we have never seen so many, and I did know they were going to work on the sun early yesterday, and last evening Esu told me to check Stereo, but at the time there were no images yet on the new UTC day and nothing on the old ones.

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov) Click on the Stereo Ahead Green EUVI on the right, select 1024 which produces the list, then click on thumbnails and click on the first one, 4:05 UTC and all the rest for hours!

Enlarge again if you wish. Selecting the highest resolution does not make it larger.

Quoting: **Nobody in Particular**

What I think is the most strange about all of this is the following:

NBIP posted the following image in the beginning of the thread. It is a real image on the STEREO site:

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov)

When I went to search for the 405 image, I found this one:

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov)

At first glance it looks like a cleaner, clearer image.

BUT, its not the same. Look at the position of the active regions (sunspots or whatever?). On the first image there are **more** active regions of the sun.

On the second image (my image) there are only a couple!

The URL is slightly different too. The first one says and \_n7euA\_195.jpg the second one says \_n4euA\_195.jpg

Something's up.

you people are stupid . You are happy about a huge objects around your only source of light for life? You cant stop them if they want to kill you by killing your star.

Quoting: **Anonymous Coward 1267719**

Are you STUPID, these craft are from HEAVEN quite literally. They are Orvonton **government** craft (milky way). These are thus from "God" and they create and maintain the creation. Our sun is in the photon belt, stuff is going to happen regardless, and we are for 4 1/2 years now in the energies coming from the center of the Milky Way, we are at the end of the allotted 550 millions years for evolution on this planet, and this is area is ascending into higher vibration. That is WHY they are here, that is WHY the visit by God himself 2000 years ago who is also returned. This is an

important time for man, and you can act stupid, or you see observe the WONDER. Which will it be?

Quoting: **Nobody in Particular**

Would you explain who/what you mean when u say Esu?

Quoting: **Anonymous Coward 1306352**

That is something making transit, not something coming out of the sun. It is behind the sun, because this is Stereo B and its on the left side. My guess is "Venus" and indeed when you click on Planets currently visible that is what NASA says it is. Understand this is NOT the Real Venus. The real Venus is in Earth's orbit because it is being terraformed, and in fact already has human folks living there from earth.

The Venus that I assume is still visible in the very early morning, have not been up to see, is STAR SHIP VENUS, and because the star ship is not orbiting the sun, NASA puts a little image there where Venus would be expected to be. Star Ship Venus just plants itself high enough above earth to be seen by all and where people expect it to be.

My guess is "Venus" and indeed when you click on Planets currently visible that is what NASA says it is. Understand this is NOT the Real Venus. The real Venus is in Earth's orbit because it is being terraformed, and in fact already has human folks living there from earth.

The Venus that I assume is still visible in the very early morning, have not been up to see, is STAR SHIP VENUS, and because the star ship is not orbiting the sun, NASA puts a little image there where Venus would be expected to be. Star Ship Venus just plants itself high enough above earth to be seen by all and where people expect it to be.

Quoting: **Nobody in Particular**

Interesting. How did you come to this conclusion?

That is something making transit, not something coming out of the sun. It is behind the sun, because this is Stereo B and its on the left side. My guess is "Venus" and indeed when you click on Planets currently visible that is what NASA says it is. Understand this is NOT the Real Venus. The real Venus is in Earth's orbit because it is being terraformed, and in fact already has human folks living there from earth.

The Venus that I assume is still visible in the very early morning, have not been up to see, is STAR SHIP VENUS, and because the star ship is not orbiting the sun, NASA puts a little image there where Venus would be expected to be. Star Ship Venus just plants itself high enough above earth to be seen by all and where people expect it to be.

Quoting: **Nobody in Particular**

Interesting. How did you come to this conclusion?

Quoting: **Luckystrike**

well for one, Star ship Venus likes to move around and put on shows, watch it. And many people were taking pics of it with their cameras and it was just obviously NOT Venus. The Star Ship does show a hologram for those with telescopes that causes it to look like Venus. but on regular cameras with modest magnification, it is a multichanging colored light.

The real Venus cannot do that so I asked some questions and Christ Michael did agree to start the teaching on this. What some people have been seeing for years now, peaking out around the sun from time to time, is the REAL Venus and NOT "Nibiru." Man must expand in this solar system, now that the prison fence is coming down.

there was a Gal from Texas and I can't remember her user, she is still here, that posted a LOT of pictures of the starship nearly two years ago now right here on GLP. She was taking them from her balcony, and I can't remember at the time if Star Ship venus was the evening star or the morning star. But look carefully at it, it's obviously an ARTIFICIAL light and it has grown larger over the years, which Venus would not do.

How do you and esu suggest we "prepare spiritually and physically"?

Quoting: **Anonymous Coward 1308823**

I would stock some FOOD and necessities. there will be so many quakes there may be difficulties in delivery. I don't need to answer the spiritual question, that is for you, but you must stay close to GOD WITHIN YOU, keep a level head and help others thru it. If there was ever a time to be in service to others, it will be now. You must listen to divine advice which will be there for all who can listen within.

[[link to stereo.gsfc.nasa.gov](#)] What is strange, is these two so different views called Venus on the stereo site. While the two satellites could be in different parts of their halo orbits, and one is behind and other ahead, I am having troubles figuring how one Venus could be so far up in the image and another so low. Poster above is referring to the image in stereo Ahead, which is on the right, in the link above. Going to have to straighten this out in my head.

You see the confusion above, for me, besides the strange locations on A and B, is that the real Venus which is in the same orbit as earth, and thus always opposite us, might actually show now that the stereo satellites are at 180 degrees. We could be seeing the real deal and the craft, but the Star Ship Venus orbits EARTH, and NASA always puts in a fake image for where Venus is supposed to be transiting the sun. This is interesting anyway.

well I just went and looked at where are A and B. [[link to stereo-ssc.nascom.nasa.gov](#)] B would be seeing Venus peaking out around the sun. Venus is supposedly sitting right in front of A which would explain the size difference. Place in halo orbit would explain why one is way below the sun possibly. Or NASA just isn't being so careful.

To Poster above, this would not be StarSHIP Venus anyway, and I doubt it's a craft, I think it's just using photoshop myself. Especially if they continue to show it moving across the screen as it is now, but may there is a CRAFT sitting out there right in front of the Camera too, to get attention.

What if...they altered the sun's radiation powers to take out the fukushima radiation (fighting radiation with radiation)

Quoting: **Silverwing 462458**

they don't need to use the sun. They can directly manipulate energies because they know how matter works at this lower level. There were neutron beams seen, around there, which could have been either the result of radiation release, or used by Fleet, the radiation CAN be changed into matter. I know this "inside" me, but I don't recall the actual techniques, but this is how to handle it before it becomes runaway in nature. convert it to something else. Build atoms from it etc, are what comes to mind.

The larger purpose of what is going on around the sun the past few years of min, is keep the sun at min, or causing the discharging to occur away from straight onto earth. That is why now that we have stereo A and B, you are seeing discharging occurring much more often away from us, than at us. but we need some of it AT us, and they have had to occasionally "inject" protons and gamma rays we NEED, and the proton injects are given INSIDE our magnetosphere and these show up on NICT, in the protons counted at geostationary orbit. Those graphs on the bottom LEFT. There will be a huge spike of protons going over the limits of the graph, 40. These are also generated by technologies they have as when the protons get too low, it sets up a magnetic reversal situation.

so this is only a portion of what they do. This is what you ones who are interested in solar system 'science" and energy maintenance might study and participate in, when you are in that Misunderstood heaven. Heaven and eternal life is not fluffy stuff, these are the sorts of things you study, learn, and engage in.

Thanks for responding about spiritual/physical prep, really that's the part I'm interested in. When I listen to myself it's only silence, I think I'm one of the agents of calm here to be ready when action needs to happen quickly. No idea, other than allowing the pressure from my heart space to radiate out and touch all near and far, earth included. It's confusing and at times feels like a mental trick, aka not really doing anything, but I know higher planes have to exist, I just don't see much evidence around most of the time. As always moving forward in faith and trust, Thanks NiP!

we have covered this here at least twice. That is WHY I placed a screen shot I took. It's hard to know when they were there, because when they were discovered there many hours ( 4 or so) of NO images and then after they removed they scrubbed them and posted the new ones, there were also hours worth of images that had been added also. The craft showed heavily in several hours of images before they mostly left.

That is something making transit, not something coming out of the sun. It is behind the sun, because this is Stereo B and its on the left side. My guess is "Venus" and indeed when you click on Planets currently visible that is what NASA says it is. Understand this is NOT the Real Venus. The real Venus is in Earth's orbit because it is being terraformed, and in fact already has human folks living there from earth.

The Venus that I assume is still visible in the very early morning, have not been up to see, is STAR SHIP VENUS, and because the star ship is not orbiting the sun, NASA puts a little image there where Venus would be expected to be. Star Ship Venus just plants itself high enough above earth to be seen by all and where people expect it to be.

Quoting: **Nobody in Particular**

Interesting. How did you come to this conclusion?

Quoting: **Luckystrike**

well for one, Star ship Venus likes to move around and put on shows, watch it. And many people were taking pics of it with their cameras and it was just obviously NOT Venus. The Star Ship does show a hologram for those with telescopes that causes it to look like Venus. but on regular cameras with modest magnification, it is a multichanging colored light.

The real Venus cannot do that so I asked some questions and Christ Michael did agree to start the teaching on this. What some people have been seeing for years now, peaking out around the sun from time to time, is the REAL Venus and NOT "Nibiru." Man must expand in this solar system, now that the prison fence is coming down.

there was a Gal from Texas and I can't remember her user, she is still here, that posted a LOT of pictures of the starship nearly two years ago now right here on GLP. She was taking them from her balcony, and I can't remember at the time if Star Ship venus was the evening star or the morning star. But look carefully at it, it's obviously an ARTIFICIAL light and it has grown larger over the years, which Venus would not do.

Quoting: **Nobody in Particular**

**The Star Ship does show a hologram for those with telescopes that causes it to look like Venus. but on regular cameras with modest magnification, it is a multichanging colored light.**

How is it possible for a hologram to work only on telescopes and not with normal cameras? The lens of a telescope and the lens of a camera are the same.

I would think it would be related to the magnification on the camera. These are not down in our atmosphere close up. They are distant.

Quoting: **Nobody in Particular**

Not possible. If anything, a higher magnification would show errors in the hologram. A lower magnification would show less detail.

You make this shit up as you go along and tell yourself that it's "information" being "channeled" to you. Fucking crazy as a goddamn loon, that's what you are.

MORE TODAY. MOST I HAVE seen for some time now on Stereo Behind.

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov)

starts about 10 UTC, more and more by 11 -12 UTC continuing on to NOW. I saw a few on Stereo Ahead, but the most on are Behind. ENJOY. In some of them "BIG PUPPY" which is about 3 times

-- AH- Candace GLP #8 -- page. 82

the size if earth is there. Nasa will erase these, make your selves a copy now.

what the hell... these look huge... unless i'm seeing the wrong thing, big greenish blobs are what they look like to me.

I say blobs because they don't appear to have a coherent shape

well so far I don't see a thread, I thought there was one, but it's a trash thread on stuff dissolving into cubes. So here we go. Go to Stereo, Click on the Green stereo AHEAD images starting at 4:05 UTC WOW, we have never seen so many, and I did know they were going to work on the sun early yesterday, and last evening Esu told me to check Stereo, but at the time there were no images yet on the new UTC day and nothing on the old ones.

[\[link to stereo.gsfc.nasa.gov\]](http://link.to.stereo.gsfc.nasa.gov) Click on the Stereo Ahead Green EUVI on the right, select 1024 which produces the list, then click on thumbnails and click on the first one, 4:05 UTC and all the rest for hours!

Enlarge again if you wish. Selecting the highest resolution does not make it larger.

CRAFT owned by the Superuniverse government. (Milky Way makes up a good chunk of the superuniverse, it's the core galaxy of it.) There are 7 superuniverses by the way, all huge. Craft of this type are no created by ordinary planets. Big Buppy, if you spot it is several times the size of earth.

part of that is reflection and part of it the varying density of the matter of them, which will appear blobbish to our eyes.

they continue today. copy of post I made in another of my threads.

[\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov) some still around this morning too. fewer now though.

Shot at 1 UTC last night. (7 pm for me) [\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov)

even a bit on cor ONE behind an hour ago. [\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov)

link to yesterdays thumbnails, they start about 10 utc and pick up a lot a couple hours later and hang the entire rest of the images which are only thru 18 UTC. [\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov)

today's list. [\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov)

BIG PUPPY in this one to the right. Big Puppy is my name for this monster craft. [\[link to stereo.gsfc.nasa.gov\]](http://stereo.gsfc.nasa.gov)

Biggest Craft I have seen on stereo yet.

[\[link to stereo.gsfc.nasa.gov\]](#) don't forget to enlarge it. Bottom left. Nasa will remove this, if you want a copy save it to your computer.
