Very important topic i think to understand why we need to do away with usury...

We need to tear out the parasites methods of debt slavery and replace it with something much more fair...

Sooner the better

[Gildswirth](#)

Check out this guys 'pedigree'

Seems like his done his time in the matrix...

This from his blurb introduction;

[\[link to abundanthope.net\]](http://abundanthope.net)

I was born in 1942 and raised as a Catholic. I attended Chevalier College, Bowral NSW. Leaving school in 1958 I worked for a stockbroker for four years. I also worked for a number of Australian federal government departments, including Social Services and Telecom (now privatised as Telstra) in Sydney.

After admission to practice as a barrister in 1967 I worked in Canberra for the Commissioner of Trade Practices for four years then spent four years with the Australian Senate Committee Secretariat.

Commencing in 1974 I spent four years in the Darwin Crown Law Office doing civil litigation court work (as a barrister and solicitor) for the federal Attorney-General's department (AGs). After the Northern Territory achieved self-government in 1978 I spent a year responsible for civil litigation for the newly created Northern Territory Crown Law Office.

I then spent about seven years in the central office of the Australian Legal Aid Office in Canberra

and in the AGs policy division which superceded it. My duties included advising successive Attorneys-General, both Liberal and Labor, about the merits of funding public interest and test cases (eg Mabo, Fraser Island & Franklin Dam) and other special interest cases relating to such matters as trade practices, defending overseas drugs prosecutions, child abduction matters, the rights of Chinese students in Australia after the 1989 Tiananmen Square massacre, legal representation for section 69 Judiciary Act cases, royal commission representation and the like.

Thereafter I spent about 11 years doing commercial law work for AGs in Canberra, retiring in late 1997.

I have an Australian National University Arts degree specialising in history, philosophy and political science.

In 2001 I wrote and self-published, a book on 'The Social Construction of Poverty: the Impact of Reserve Bank Monetary Policy on the Australian Labour Market'.

My main achievement has been helping my wife raise three lovely industrious young adults.

I am delighted and honoured to be appointed as AbundantHope's Regional Director for Australia and New Zealand.

since this just finished, the archive is not up yet on the radio site archive link. When it is I will add the links, Click on the show THE SOURCE in the archive for Thursday night at 11 pm (australia time), and 12 am Friday does not work yet. I will post when they do.

This was a really GREAT overall coverage of how it works. Folks, the Federal Reserve as I post here all the time, is NOT just the central bank of the United States. Its the global Central Bank of the worlds Central Banks and is the financial took of the Committee of 300. The queen of England IS the Chairman of the committee of 300. I have documentary proof of this but we cannot yet post it on my website if we want to keep people alive. You can see however an example, but the queens signature is forged, here:

[\[link to benjaminfulford.typepad.com\]](http://link.to/benjaminfulford.typepad.com) The signature of the queen is a forgery though. I know this because I know what her signature looks like. So that document is not real, but the real documents of similar purpose look similar to that one.

My podcast I planned on these topics is here: but it did not stay on topic. But check out the links in the thread anyway. Maybe one day I will work on it some more.

Bob Chapman is a good guy and this is good shorthand for the uninitiated. If you want to go deeper into the economics of rent, interest, banking, etc., I suggest Murray Rothbard's work or even Mises' Theory of Money and Credit if you can deal with the old timeyness of the writing. Whether all interest is inherently unproductive (the Ricardian position) or whether it serves an informational purpose in setting other prices is an important subject and connected intimately with the economic woes the country faces today.

Thank you Captain Obvious for reminding us what has already been known for quite some time.

Sarcasm aside,... Yes, you would be correct! Even though money doesn't really exist, our lives are so integrated into the current monetary system the globe employs that we have no choice but to deal with the kinks and bumps that the governing institutions of the wealth tend to dictate through policy that meets their necessity.

Isn't this also why President Lincoln decided to create the Greenback to fund the civil war rather than taking loans from Europe's bank at ridiculously high interest rates? The Greenback currency was supposedly not backed by gold, silver or oil etc, but rather backed by nothing other than the "full faith and credit of the United States", in turn saving the US from having to pay immense sums of interest.

Unfortunately, issuing the Greenback might've also led to his ultimate demise in Ford's Theatre as well...

04/07/2012 08:27 AM

G'day ACDC,

You old cynic you...

There are two main possibilities. First, it is inevitable that the existing US fiat money system introduced with the establishment of the Federal Reserve System (the Fed) in 1913 will collapse soonish. The US fiat money system has already greatly exceeded the life span of ANY other fiat money system in known history. Accordingly, being of sound body and mind I expect to be alive when that happens. The chaos and confusion it will cause may result in quite a few people ceasing to remain on the planet shortly thereafter.

The collapse of the US fiat money system will destroy not only the US dollar and the US economy but also the fractional reserve banking system in the US and globally because the Fed acts, in effect, as the Rothschilds' Central Bank for all their Central Banks. That's why the Fed dished out billions of dollars in bailout money to foreign banks.

Think about it. Who is gonna continue to pay interest to banksters in the US and Australia for imaginary money created out of thin air by banking bookkeepers typing digits into bank accounts, once the global economy collapses and people actually realise that fractional reserve banking is a scam used to defraud and enslave them?

The second, and more optimistic scenario would be for Michael of Nebadon to arrange for Star

Fleet to intervene to save humanity's hide. IF (or rather when) that happens usury and fractional reserve banking, if still extant, will be abolished instantly, for obvious reasons.

Either way, it seems to me that I WILL SEE the abolition of usury and fractional reserve banking and probably so will you.

G'day ACDC,

You old cynic you...

There are two main possibilities. First, it is inevitable that the existing US fiat money system introduced with the establishment of the Federal Reserve System (the Fed) in 1913 will collapse soonish. The US fiat money system has already greatly exceeded the life span of ANY other fiat money system in known history. Accordingly, being of sound body and mind I expect to be alive

when that happens. The chaos and confusion it will cause may result in quite a few people ceasing to remain on the planet shortly thereafter.

The collapse of the US fiat money system will destroy not only the US dollar and the US economy but also the fractional reserve banking system in the US and globally because the Fed acts, in effect, as the Rothschilds' Central Bank for all their Central Banks. That's why the Fed dished out billions of dollars in bailout money to foreign banks.

Think about it. Who is gonna continue to pay interest to banksters in the US and Australia for imaginary money created out of thin air by banking bookkeepers typing digits into bank accounts, once the global economy collapses and people actually realise that fractional reserve banking is a scam used to defraud and enslave them?

The second, and more optimistic scenario would be for Michael of Nebadon to arrange for Star Fleet to intervene to save humanity's hide. IF (or rather when) that happens usury and fractional reserve banking, if still extant, will be abolished instantly, for obvious reasons.

Either way, it seems to me that I WILL SEE the abolition of usury and fractional reserve banking and probably so will you.

Well hello Ron.. from one old cynic to one old optimist.. optimism is good provided it has a healthy reality testing principal attached to it (old farts call this cynicism cause they've been around for too long and seen too much). Otherwise it is self delusion. And you anchor self-delusion into bad old reality by setting DATES... so prey tell, WHEN is all this going to happen and what are the TANGIBLE SIGNS. I've been hearing about these so called tangible signs for over 50 years now. Can you understand my (and just about everybody else's) cynicism over these matters?.. Give us DATES, give us tangible PROOF... and then we can sit back and watch it all go up in wisps of smoke like we have for the last 50 years. This entire 2012 thing is a total furphy as well and it is criminal to raise people's hopes when they will simple be dashed, time and time again...

Demand redemption of Federal Reserve currency for lawful money per 12 USC 411 and you effectively cut the chain of debt and fractional reserve lending.

Many people have done it and are doing it to.

There is a long thread on GLP about it.

Offering a solution to the trap of FIAT and USURY is way more important than spending hours talking about the evils of it.

Simply put, you are either part of the problem, or you are part of the problem, if you are not demanding lawful money per 12 USC 411, you are part of the problem.

Quoting: **Anonymous Coward 9488037**

Actually, that is only partially true. "MONEY" is defined in the Republic as being coins. Other laws define it as Gold or Silver of a certain weight and purity.

Granted, by law of contract, anything can be money when defined and agreed upon, but lawfully speaking, only Congress has the right to "coin money" and set the "value thereof".

That is the law of the land and is not debatable, accept by those who favor or profit from usury and fractional reserve banking (money changers).

Quoting: **ACDC 433433**

G'day ACDC,

I can understand your scepticism. Aware individuals have been waiting a looong time for the global matrix to crack.

But remember the old saying; "Rome wasn't built in a day". And so it is with its deconstruction.

I don't recall saying I was an optimist – although arguably I am. What I said was that the optimistic scenario would occur if Michael of Nebadon got Star Fleet to intervene on behalf of long suffering, sleeping humanity.

DITTO re dates. I did not give any nor will I. Although I did imply and do expect that the current fraudulent global monetary and financial system will collapse "soonish" which I perceive to be well within my lifetime.

As for 2012 and "dates" generally – you need to go to the New Age folk for those matters.

However, it seems to me that TANGIBLE SIGNS of the disintegration of the old, corrupt globalist banking and economic slavery system are getting fairly obvious today. Admittedly OZ exists in some sort of unreal Globalist bubble these days but even "The Lucky Country" is beginning to show signs of wear and tear. Imagine how those signs will multiply when the US dollar disappears up its own fundamental orifice. After all, OZ has always gone "All the way with the USA" so we can confidently expect to accompany the US upon its new trajectory even if the Chinese ignore our vigorous support for US military adventures and the encirclement of China, by continuing to treat us fairly in the trade arena.

As I see it, the existing US dollar (USD) reserve currency system depends upon the rest of the world accepting Anglo-USrael economic hegemony and continuing to use the USD. That ain't gonna continue to happen. In the past the US has enforced the dominance of the USD using Economic Hitmen and, where deemed necessary, bombing recalcitrant nations like Germany, Japan, Korea, Vietnam, Iraq, Afghanistan and Libya back to the Stone Age. Arguably though, Libya was the last "free lunch" for the Khazarian based Anglo-USrael imperial empire. Its all down hill from here because Russia and China have said "NO" to use of that technique in Syria and Iran.

To understand the "tangible signs" of change you have to look at what the BRICS (Russia, China, India, Brazil and South Africa) nations are doing. Those nations represent half the population of the world and its most dynamic economies. Iran, Kazakhstan and many other nations are also keen to join the BRICS coalition.

On 29 March 2012 the BRICS nations signed two agreements to provide line of credit to the business community and decided to examine the possibility of setting up a development bank on lines of multilateral lending agencies.

The agreements were signed by officials of five countries -- Brazil, Russia, India, China and South Africa -- at the fourth BRICS summit in New Delhi.

"The agreements signed today by development banks of BRICS countries will boost trade by offering credit in our local currency," Prime Minister Manmohan Singh said in a media statement after the meeting.

The Master Agreement on Extending Credit Facility in Local Currency and the Multilateral Letter of Credit Confirmation Facility Agreement are being perceived as a step towards replacing the US dollar as the main unit of trade between them.

Such intra-BRICS initiatives, according to officials, will not only contribute to enhanced trade and investments among the nations but would also facilitate economic growth in difficult economic times.

The initiative to set up a BRICS Development Bank on the lines of the World Bank would allow the member countries to pool resources for infrastructure development and could also be used to lend during the difficult global environment. Incidentally, Muammar Gaddafi was in the process of having Libya create and substantially fund an African Development Bank that would have released African nations from the debt slavery imposed there by the IMF and World Bank. THAT was a major reason for the US and NATO organised killing of Muammar Gaddafi and the destruction of the Libyan nation and its genuinely democratic Jamahiriya governance structures. Of course the Khazars and their enablers also lusted after the gold and assets owned by the Libyan peoples'owned Central Bank, and Libya's oil and water wealth, but those war trophies were the icing on the cake. The prime goal would have been to snuff out the threat of a Libyan lead independent Africa.

But I digress.

Intra-BRICS trade is about USD 230 billion and has the potential of more than doubling to USD 500 billion by 2015. see eg [\[link to www.financialexpress.com\]](http://www.financialexpress.com)

Frankly, I think the above estimates are conservative. Anyway, the writing is on the wall, cobber. The USD cannot survive as the global reserve currency IF the BRICS' initiative continues; and it seems that the Anglo-USrael empire cannot stop it.

Also, bear in mind that it has been said that China has now wrested control of the Fed away from the Rothschilds and will presumably be trying to recoup as much value as it can for its trillion USD debt holdings before the US disappears in a shower of shit.

The imminent global dissemination of information on and commercially available quantum (zero point) energy devices must also be added to the mix. That information spells the end of the Khazar banksters' debt money system also. See eg: [\[link to abundanthope.net\]](http://abundanthope.net) And: [\[link to abundanthope.net\]](http://abundanthope.net)

See also: [\[link to abundanthope.net\]](http://abundanthope.net)

NOTE also, that the military applications of these research developments are available to the Russians and Iranians respectively. But even ignoring such implications, the negative aspects for USrael of any attack on Syria or Iran are overwhelming.

Sooo, for these reasons, as well as having regard to the obvious signs of financial and economic collapse in the EU, I think that the current USD fiat monetary cum banking system is on its last

legs. No dates, no pack drill... but the final result seems beyond question. And any attempt to use the US military to prevent the collapse by eg making war on Syria or Iran, will just hasten the coming debacle. Why? Because the US, NATO and Israel are on a hiding to nothing if they try to bomb Syria or Iran. See eg: Armageddon Approaches: [\[link to abundanthope.net\]](http://link.to/abundanthope.net) And: [\[link to vidrebel.wordpress.com\]](http://link.to/vidrebel.wordpress.com) And: [\[link to abundanthope.net\]](http://link.to/abundanthope.net)  
For a general perspective see: [\[link to abundanthope.net\]](http://link.to/abundanthope.net)

Of course there are many other similar analyses going back, at least to the work of the late Joe Vialls up to 10 years ago. In other words, the Amerikkans and their allies are full of shit when it comes to a military showdown with a country like Iran that has a real military, let alone with Russia and China who are almost certainly vastly superior militarily.

Sooo, whether the current US based fiat monetary and fractional reserve banking system collapses because of its lack of substance and its inherent inflationary instability or because USrael try to initiate WWII, the result will be the same. And it will happen "soon"

As I understand it, the "optimistic" scenario will only occur if Earth changes or Khazarian attempts to destroy humanity and the planet get out of hand. Again, one cannot put a date on those possibilities.

Take care,  
Ron

Where does the money come from?

We all know that the Federal Reserve CORPORATION prints money - then loans it, at interest, to our government. But wait until you see what a total scam this process is. But before we get to the meat of this issue, let's remember one thing about the very essence of banking - primarily that money should have some type of standard upon which its value is based. In the case of America, we operate on what is called a "gold standard" (i.e. our money is backed by gold).

So, with that in mind, let's look at how money is actually created, and at what cost. If the Federal Reserve wants to print 1,000 one-hundred (\$100) bills, their total cost for ink, paper, plates, labor, etc. would be approximately \$23.00 (according to Davvy Kidd in "Why A Bankrupt America"). Now, if you do the math, the total cost of 10,000 bills would be \$230.00 ( $\$.023 \times 10,000$ ). But, and here's the catch - 10,000 \$100 bills equals \$1,000,000! So, the Federal Reserve can "create" a million dollars, then LEND it to the U.S. Government (with interest) for a total cost of \$230.

00! That's not a bad deal, huh!

The banking industry calls this process "seignorage." I call it outright THEFT. Why? Well, regardless of the immense profit margin (\$1,000,000 for \$230), plus the huge interest payments, our government then needs to STEAL the American people's money to payoff their debts via a Mob-like agency called the IRS. So the bankers steal from the government, then the government turns around and steals from the people. I'm no genius, but who do you think is getting screwed in this process? US - the people at the bottom rung of the ladder.

In my own writing,knowledge shared to me by my brothers and sisters...

Now that we know the Federal Reserve is a privately owned, for-profit corporation, a natural question would be: who OWNS this company? Peter Kershaw provides the answer in "Economic Solutions" where he lists the ten primary shareholders in the Federal Reserve banking system.

1) The Rothschild Family - London 2) The Rothschild Family - Berlin 3) The Lazard Brothers - Paris 4) Israel Seiff - Italy 5) Kuhn-Loeb Company - Germany 6) The Warburgs - Amsterdam 7) The Warburgs - Hamburg 8) Lehman Brothers - New York 9) Goldman & Sachs - New York 10) The Rockefeller Family - New York

Now I don't know about you, but something is terribly wrong with this situation. Namely, don't we live in AMERICA? If so, why are seven of the top ten stockholders located in FOREIGN countries? That's 70%! To further convey how screwed-up this system is, Jim Marrs provides the following data in his phenomenal book, "Rule By Secrecy.

" He says that the Federal Reserve Bank of New York, which undeniably controls the other eleven Federal Reserve branches, is essentially controlled by two financial institutions:

1) Chase-Manhattan (controlled by the Rockefellers) - 6,389,445 shares - 32.

3%

2) Citbank - 4,051,851 shares - 20.

5%

Thus, these two entities control nearly 53% of the New York Federal Reserve Bank. Doesn't that boggle your mind? Now, considering how many trillions of dollars are involved here, and how the bankers are WAY above our "selected" officials in Washington, D.C., do you think the above-listed banks and families have an inordinate amount of say-so in how our country is being run? The answer is blindingly apparent.

Where does the money come from?

We all know that the Federal Reserve CORPORATION prints money - then loans it, at interest, to our government. But wait until you see what a total scam this process is. But before we get to the meat of this issue, let's remember one thing about the very essence of banking - primarily that money should have some type of standard upon which its value is based. In the case of America, we operate on what is called a "gold standard" (i.e. our money is backed by gold).

So, with that in mind, let's look at how money is actually created, and at what cost. If the Federal Reserve wants to print 1,000 one-hundred (\$100) bills, their total cost for ink, paper, plates, labor, etc. would be approximately \$23.00 (according to Davvy Kidd in "Why A Bankrupt America"). Now, if you do the math, the total cost of 10,000 bills would be \$230.00 ( $\$.023 \times 10,000$ ). But, and here's the catch - 10,000 \$100 bills equals \$1,000,000! So, the Federal Reserve can "create" a million dollars, then LEND it to the U.S. Government (with interest) for a total cost of \$230.00! That's not a bad deal, huh!

The banking industry calls this process "seignorage." I call it outright THEFT. Why? Well, regardless of the immense profit margin (\$1,000,000 for \$230), plus the huge interest payments, our government then needs to STEAL the American people's money to payoff their debts via a Mob-like agency called the IRS. So the bankers steal from the government, then the government turns around and steals from the people. I'm no genius, but who do you think is getting screwed in this process? US - the people at the bottom rung of the ladder.

What's worse is that - now catch your breath - there's NO MORE gold left in Fort Knox! It's all gone. In other words, the GOLD STANDARD that our financial system was based upon is now an illusion. We can't convert our money into gold --- only other currency. The entire underlying basis for our money is now a lie - a sham. The Federal Reserve has become so arrogant that they've become a literal MONEY MAKING MACHINE, creating currency out of thin air! So that's where the Fed gets their money - they literally make it, then lend it to us so they can make even MORE money off of it.

### Money As A Religion

The above-detailed process has become so ridiculous that William Grieder, former assistant managing editor of the Washington Post, wrote a book in 1987 entitled, "Secrets of the Temple: How the Federal Reserve Runs the Country" that details how the Controllers have conditioned us to accept this absurd situation.

To modern minds," he writes, "it seemed bizarre to think of the Federal Reserve as a religious institution. Yet the conspiracy theorists, in their own demented way, were on to something real and significant. The Fed did also function in the realm of religion. Its mysterious powers of money creation, inherited from priestly forebears, shielded a complex bundle of social and psychological meanings. With its own form of secret incantation, the Federal Reserve presided over awesome social ritual, transactions so powerful and frightening they seemed to lie beyond common understanding.

"

Mr. Grieder continues, "Above all, money was a function of faith. It required implicit and universal social consent that was indeed mysterious. To create money and use it, each one must believe, and everyone must believe. Only then did worthless pieces of paper take on value.

"

Do you get it? MONEY is an ILLUSION! Why? Because the gold standard upon which our money is supposed to be based has been eliminated. There's no more gold in Fort Knox. It's all GONE! Now, money really IS only paper!!! In the past, money was supposed to represent something of tangible value.

Now it's simply paper!

Taken one step further, many of us don't even use paper money any more! Why? Well, here's a

scenario. Many places of employment directly deposit their employee's paychecks into the bank. Once the money is there, when bill time comes around, the person in question can write out a stack of checks to pay them. Plus, when they need gasoline they use a credit card; and groceries a debit card. If this person goes out for dinner on Friday night, they can charge the tab on their diner's card. But what about the tip? They simply scribble in the amount at the bottom of the check. So far, the person hasn't spent a single dollar bill. Plus, if you bring electronic banking into the picture, we've virtually eliminated the use for money.

And, God forbid, what happens when encoded microchips are implanted into the backs of our hand?

In essence, money has become nothing more than an illusion - an electronic figure or amount on a computer screen. That's it! As time goes on, we have an increasing tendency toward being sucked into this Wizard of Oz vortex of unreality. Think about it. Americans as a whole are carrying more personal debt than in any other time in history. Plus our government keeps going further and further into the hole, with no hope of ever crawling out. But we have less and less actual MONEY! We're being enslaved by the debt of electronic blips on a computer screen! And 70% of the banks that control this debt via the Federal Reserve exist in foreign countries! What in God's name is going on? As author William Bramley says, "The result of this whole system is MASSIVE debt at every level of society."

We're getting screwed in a sickening way, folks, and the people doing it are demented magician-priests that use the ILLUSION of money as their control device. And I hate to say it, but if we allow things to keep going as they are, the situation will only get worse. Our only hope ... ONLY HOPE ... is to immediately take drastic action and remedy this crime.

Dear one, where have you been, we operate on NO GOLD STANDARD IN AMERICA NONE. Do not pay so much attention to Devvy, she does not have the information we do. While it is true the printing costs etc virtually all MONEY is created by their imagination. **There is no gold backing it.**

WE have a great deal of information on our site also about the OITC, and Foundation Divine. As to ron's story above about Libya, Ghaddafi was also guardian and protectorate of Foundation Divine wealth in that region of the world. I would suggest a simple reading here to familiarize yourself with the OITC and the Foundation Divine.

[\[link to abundanthope.net\]](http://link.to.abundanthope.net)

The OITC was recently destroyed by a game that is difficult to cover here and I shall not. But China was involved, as well as several various counter and double agents including rogue CIA. You may remember this thread from October 2010 here.

[Thread: Chinese briefcases were opened today - what will you be told?](#) It is loosely true and those suitcases were notice of Chinese Dragon intent to take over the FEDERAL RESERVE which has been the monetary tool of the Committee of 300 and which has been IN FACT the Global Central bank of the Central banks and it has only to do with being the US Central Bank because of the dollar being the reserve currency and the Khazar Control thru this country.

Devvy writes some valid stuff, I recommend her, but she does not know the depth and almost everyone I have read who writes about the FED does not know it is the Global Central Bank It is time to start understanding that.

I would highly suggest forgetting Devvy and paying attention to Ron Chapman, he is well versed.

None of that 'making money out of air' makes a difference unless and until someone endorses the debt.

As usual, people come here with all their anti-FED blather and smoke, but offer no solution. I heard it, read about it and studied it for years, but still no solution.

Then I found out about 12-USC 411 and lawful money redemption.

Follow this guru or that guru, he knows more than so-and-so, well, it is all moot without real, workable solutions RIGHT NOW.

I have provided that solution, the same solution that was there when Abe Lincoln first issued the greenbacks is here today.

**DEMAND IS MADE FOR LAWFUL MONEY PER 12-USC 411**

Take it or leave it, but wordy posts with no solution, interviews with so called 'experts' who are getting paid with Federal Reserve Debt mean crap to me, because they are still part of (and actively endorse) the system they preach against.

I will let Ron answer to your demand. If there is a 12\_usc 411 that is valid, he probably knows about it. so not one more post on that one, as you are not going to hog the thread with it, until HE SEES and can make a reply. This stuff is not doable by a general public who knows nothing of it and has no courage to face jail and worse. There are lots of success stories out there that are not success stories and when people try them, they loose it all and/or go to jail.

Did you get YOUR "lawful money redemption" or are you full of hopes and hot air but no action?

Did it work for you? If you did it, fine, let us know how it worked for you. There is no taking down the global federal reserve system by any such small measures, nor have people been able to take down the IRS either, because these thugs have big guns and well paid courts and attorneys who work for them and not the people.

I am not being impolite here, understand at this point in time, its too late for the people, even though I often say the people had something to do with letting it happen. They did, they followed all the rules and they love their money and can see no other visionary way. That will come in the future at some point. Maybe some people used this, but again I ask, how are they doing, how do you do business as usual ? Please actually place the link to that old thread if you are going to make an issue here. But again, as Ron to address what he knows or does not know about it first.

You ones are going to come into an understanding of the global issues facing this world, or not, its your choice. Also the Fed does not just "print" money, it makes money by method of Digital Credits also.

It is 10:30, I am going to bed. Ron may or may not be back over my night., It may be a family day of easter where he is too.

I don't see that above. I think most here on glp hopefully do know the money is made out of thin air though. Lets get to the more nitty gritty which Ron may decide or not to continue here in this thread. We don't need rehash of some old Devvy stuff.

He is very talented and I spent a lot of time with the OITC guys, now out of work with the destruction of the OITC. WE have tons of coverage on our site. TONS if you could print it and weigh it would probably not be an underestimate. I don't know how much paper makes a pound.

...

I will let Ron answer to your demand. If there is a 12\_usc 411 that is valid, he probably knows about it. so not one more post on that one, as you are not going to hog the thread with it, until HE SEES and can make a reply. This stuff is not doable by a general public who knows nothing of it and has no courage to face jail and worse. There are lots of success stories out there that are not success stories and when people try them, they loose it all and/or go to jail.

Did you get YOUR "lawful money redemption" or are you full of hopes and hot air but no action? Did it work for you? If you did it, fine, let us know how it worked for you. There is no taking down the global federal reserve system by any such small measures, nor have people been able to take down the IRS either, because these thugs have big guns and well paid courts and attorneys who work for them and not the people.

I am not being impolite here, understand at this point in time, its too late for the people, even though I often say the people had something to do with letting it happen. They did, they followed all the rules and they love their money and can see no other visionary way. That will come in the future at some point. Maybe some people used this, but again I ask, how are they doing, how do you do business as usual ? Please actually place the link to that old thread if you are going to make an issue here. But again, as Ron to address what he knows or does not know about it first.

You ones are going to come into an understanding of the global issues facing this world, or not, its your choice. Also the Fed does not just "print" money, it makes money by method of Digital Credits also.

It is 10:30, I am going to bed. Ron may or may not be back over my night., It may be a family day of easter where he is too.

Quoting: **Nobody in Particular**

I have been redeeming lawful money for nearly 4 years now. I really could care less "What Ron knows".

I know, I do it, as have many others. What has Ron done that hundreds if not thousands have done? Talk, write, lecture and talk some more, all the while still endorsing, using and profiting from the very system he huffs and puffs about.

No solutions, no changes, nothing from the so called "lawyer" Ron. By the way, I seriously doubt he is a lawyer, an attorney at law, maybe, but if he is a member of the BAR, he is no lawyer and is, in fact, a sworn member of the very group of people actively working to enslave the human race under Corporate rule.

Again, part of the problem or part of the solution, no middle of the road.

Those are the facts.

G'day cobbers,

Thanks CosmicHippy for a good run down on the current situation with the Fed's money scam and your ID of the Ashkenazis who own it and are, as a consequence, enslaving USans and all humanity. And "yes" I note that you mentioned that the US dollar (USD) is not backed by gold. That situation has existed since 1933, as NIP says. Those not familiar with how it came about may find James Trafficant's truth telling experience in congress interesting. See eg: [\[link to abundanthope.net\]](http://abundanthope.net)

This whole monetary and banking subject is huge. What I try to do is help people to become aware of the scam and its general effects. CosmicHippy, you mention that US fiat money is an illusion, and so it is. The problem is that "money" today is an idea rather than a thing and as such it is a mind control mechanism which the banksters have spent centuries inculcating into human consciousness to the extent that today they have been able to entrain the thought processes of almost everyone on the planet. As I see it, our job is to chip away at that meme so that people can start to see it for what it is. As it stands the USD and the money meme generally, exists because people believe in it. Until and unless a critical mass of humanity understands the true situation, that meme will continue to exist and humanity will stay enslaved, in effect, by choice. Arguably, deliberate ignorance is a choice.

Given the banksters near total control of political, economic, educational, social and the mainstream media aspects of human life; AND their monopoly on force and violence on the planet, it seems to me that, in the short term, the only way out of humanity's current predicament will be via some radical shock to the global financial and economic system such that people will rethink (or at least start to think about) what money is and how and why it is being used to exploit and enslave humanity. That's why I think that the most likely solution to the current ridiculous global monetary cum banking system will come when the system implodes. That process is well under way.

In the meantime I feel that the main thing I can do is try to increase general awareness about the criminal absurdity of the global monetary and banking systems and the equally fictional and fraudulent system of corporate personhood that enables the whole global farce to take place.

While individuals can chip away at the edges of the money issue as 13870395 mentions, the situation will not change until a significant number of USans and, hopefully, substantial numbers of people all around the world, UNDERSTAND that money is not necessary to human existence and that it is a mind control mechanism imposed on humanity by hidden global controllers. THAT task is huge and is unlikely to bear fruit until hundreds of millions of people in the Western World find that they are no longer comfortable in their current enslaved condition.

When the USD plummets in value people will start to question the system but very few will bother to do so before that happens. When it does happen, those who are awake to the problem will need to help everyone else to understand what is happening because there will be great shock and much chaos and suffering.

As far as I am concerned, the main point of understanding these matters, and telling others about them, is simply a matter of consciousness raising. It's not a matter of being an expert, its about being conscious and sharing what one knows. That is difficult because most people do not want to hear the truth but we must persevere. Or so I think.

Arguably government as we know it, is organised crime. Why? Because governments are the instruments used by the banksters to manipulate and dominate humanity. Global monetary and banking fraud could not exist without the secret complicity of governments and so it is also necessary to educate people about those aspects of the problem also. That will be very difficult to do because concepts like the "Strawman" seem sooo unreal that most people reject such information without considering it at all. In truth though, people react to the idea of fractional reserve banking in much the same way. All in all, I suspect that the entire global societal system will have to collapse before human consciousness will come to grips with these issues on a global basis.

Great Video Andyjax. The fact that a 12 year old girl is delivering the message may just stir the consciousness of some sleepers.

Blessings to all,

Ron

Hey Ron, US Treasury Notes are backed by Gold, 300 million in Gold coin, to be exact.

I only use US treasury Notes for all my transactions. So do many others.

My questions to you are:

Have you, on the record, demanded lawful money at your bank?

Have you restricted your deposits, withdrawals and transactions be done in lawful money?

If not, why not?

If you are an attorney, you certainly know how to reserve your rights via restricted endorsement (signature) and demand your right to lawful money?

Thanks :)

G'day 13870395,

This is not a competition. We are attempting to raise human consciousness so that the usurious

fictional fiat monetary cum fractional reserve banking systems enslaving humanity can be dissolved and replaced with positive, genuine societal mechanisms that will enhance people's ability to exchange goods and services without exploitation. That is the way to abundance and happiness for all.

Humanity is currently controlled by monopolistic fiat money creation systems controlled by corporate Central Banks globally. Criminal political puppet governments have unlawfully given those Banks exclusive licenses to impose fictional money, usury and fractional reserve banking practices on most nations in the world. Unless a critical mass of humans get to understand this situation and wish to change it, it will continue. I, and Abundant Hope seek to bring that change about. This is a consciousness raising exercise. It is not a personal aggrandisement project.

It follows that I see no merit in seeking to garner personal advantage from my knowledge of the system. Humanity can only transition to a higher level of consciousness and thus experience abundance, as a community. The fact that individuals achieve personal benefits while leaving everyone enslaved will not change anything. Although achieving control of one's "Strawman" may give one more "money" or at least more of the things money can buy, it will not free humanity from the thrall of the bankers and their enablers and henchmen.

See eg Mary Croft's E book (How I Clobbered Every Bureaucratic Cash Confiscatory Agency Known To Man) at: [\[link to thecrowhouse.com\]](http://link.to.thecrowhouse.com) Or at: [\[link to www.hackcanada.com\]](http://link.to.www.hackcanada.com)

And: "Natural Man vs. Artificial Person, Law, Money & Banking" in six parts the first being: [\[link to www.youtube.com\]](http://link.to.www.youtube.com) , and others like her, have done their best to help wake people up to the truth about Strawman enslavement but it appears that most of those who have managed to exempt themselves from banker ownership have not.

Since the 1930s the bankers have assiduously continued to construct a world of illusion in which wage-workers think they are free while their only real freedom is the ability to pay for their own upkeep while accepting whatever work and wages the controllers offer and paying all the taxes, licence fees, charges and penalties levied upon them by the fictional corporate legal entity "state" and myriad other fictional corporations. So, instead of humanity rapidly working its way towards utopia during the last 80 years it has been steadily grinding its way to dystopia.

In his Investigative Report Re the US Strawman UCC/Redemption Process, Barton A. Buhtz states:

'According to government sources well over twenty-five million UCC financing statements have been filed with UCC offices in many states.\* Corresponding commercial paperwork has been sent to the Secretary of the Treasury. These facts have been compiled through information obtained from the CID of the IRS, FBI, Secret Service, Justice Department, the Department of the Treasury and the Secretary of State. By their own admission not one properly filed UCC form has been rejected or criminally prosecuted.' [Found at: [\[link to www.tpuc.org\]](http://link.to.www.tpuc.org) And see: [\[link to abundanthope.net\]](http://link.to.abundanthope.net) And: [\[link to abundanthope.net\]](http://link.to.abundanthope.net)

The implication is that as at May 26, 2003 (the time of the writing of that report) over 25 million people had reclaimed their Strawman and gained the financial benefits available to them as a result. That is a very substantial number! If even half that number of people had gone public with their knowledge of the fraudulent arrangements involved, the bankers' and their enablers and political puppets would have been exposed and the current enslavement of the US population would be but a distant memory. BUT they didn't! That failure to publicise the truth implies that most of the 25 million plus individuals involved (that number will no doubt be considerably larger today) ARE COMPLICIT in the extortionate enslavement of their fellow humans.

There is an old canard that says: 'All that is required to allow evil to flourish is that too many good men do nothing.' In my view the truth is really that men do nothing because they perceive that to be in their interests. Certainly that is why the current global matrix has flourished for so long. In this instance many, many millions of USans must have deliberately done nothing in order to preserve the status quo although they KNEW about and greatly benefited from this vicious rort that was and is enslaving the majority of USans and most of the rest of the world.

It is probably reasonable to assume that the same situation applies in the UK, Canada, Australia and all the other countries in which this system of enslavement was put in place in 1933. The implication is that there may well have been millions of "insiders" in countries outside the US who were/are COMPLICIT in the same way.

What this tells us is that the long-term, on-going global banksters' New World Order conspiracy to "own" the world and everyone and everything in it has been tacitly supported by huge numbers of minions and hangers-on who sought to benefit from the process whether or not they understood the entire plot or, more likely, just their little compartmentalised portion of it.

It seems clear that very few ordinary folk who are not complicit in some way in this devious system will have discovered it and been able to redeem their Strawman before now. Clearly though, the number of ordinary folk learning how to do it will be growing steadily as the information seeps into general consciousness via the internet.

In my view everyone who becomes aware of this situation should try to fully understand it and then communicate their knowledge to as many people as possible. If that is done the scam will unravel as awareness and consciousness increases. The result will be that the banksters' scheme to impose a New World Order that totally enslaves humanity will collapse along with this scam. At the end of his Report Barton Buhtz quotes Esu Immanuel: 'You shall know the truth and the truth will set you free,'  
And so it is and so it will be!

So 13870395, my position is that I do not seek to personally profit from "inside" information about the banksters' conspiracy to rape, pillage, enslave and dominate humanity and our world, I just want everyone to come to understand what is happening so that the carnage and devastation will stop, for everyone. Then we will all benefit and abundance can be shared.

And 13870395, please keep a civil tongue in your head. Telling the Lady from Mexico that she is ignorant but you are not smacks of argumentum ad hominem. Capiche?

Blessings

Ron

Where does the money come from?

We all know that the Federal Reserve CORPORATION prints money - then loans it, at interest, to our government. But wait until you see what a total scam this process is. But before we get to the meat of this issue, let's remember one thing about the very essence of banking - primarily that money should have some type of standard upon which its value is based. **In the case of America, we operate on what is called a "gold standard" (i.e. our money is backed by gold).**

So, with that in mind, let's look at how money is actually created, and at what cost. If the Federal

Reserve wants to print 1,000 one-hundred (\$100) bills, their total cost for ink, paper, plates, labor, etc. would be approximately \$23.00 (according to Davvy Kidd in "Why A Bankrupt America"). Now, if you do the math, the total cost of 10,000 bills would be \$230.00 (\$.023 x 10,000). But, and here's the catch - 10,000 \$100 bills equals \$1,000,000! So, the Federal Reserve can "create" a million dollars, then LEND it to the U.S. Government (with interest) for a total cost of \$230.00! That's not a bad deal, huh!

The banking industry calls this process "seignorage." I call it outright THEFT. Why? Well, regardless of the immense profit margin (\$1,000,000 for \$230), plus the huge interest payments, our government then needs to STEAL the American people's money to payoff their debts via a Mob-like agency called the IRS. So the bankers steal from the government, then the government turns around and steals from the people. I'm no genius, but who do you think is getting screwed in this process? US - the people at the bottom rung of the ladder.

Quoting: **CosmicHippy**

Dear one, where have you been, we operate on NO GOLD STANDARD IN AMERICA NONE. Do not pay so much attention to Devvy, she does not have the information we do. While it is true the printing costs etc virtually all MONEY is created by their imagination. **There is no gold backing it.**

WE have a great deal of information on our site also about the OITC, and Foundation Divine. As to ron's story above about Libya, Ghaddafi was also guardian and protectorate of Foundation Divine wealth in that region of the world. I would suggest a simple reading here to familiarize yourself with the OITC and the Foundation Divine.

[\[link to abundanthope.net\]](http://link.to.abundanthope.net)

The OITC was recently destroyed by a game that is difficult to cover here and I shall not. But China was involved, as well as several various counter and double agents including rogue CIA. You may remember this thread from October 2010 here.

[Thread: Chinese briefcases were opened today - what will you be told?](#) It is loosely true and those suitcases were notice of Chinese Dragon intent to take over the FEDERAL RESERVE which has been the monetary tool of the Committee of 300 and which has been IN FACT the Global Central bank of the Central banks and it has only to do with being the US Central Bank because of the dollar being the reserve currency and the Khazar Control thru this country.

Devvy writes some valid stuff, I recommend her, but she does not know the depth and almost everyone I have read who writes about the FED does not know it is the Global Central Bank It is time to start understanding that.

I would highly suggest forgetting Devvy and paying attention to Ron Chapman, he is well versed.  
Quoting: **Nobody in Particular**

i know, did you read my full post?

you must have missed this part:)

"What's worse is that - now catch your breath - there's NO MORE gold left in Fort Knox! It's all gone. In other words, the GOLD STANDARD that our financial system was based upon is now an illusion. We can't convert our money into gold --- only other currency. The entire underlying basis

for our money is now a lie - a sham. The Federal Reserve has become so arrogant that they've become a literal MONEY MAKING MACHINE, creating currency out of thin air! So that's where the Fed gets their money - they literally make it, then lend it to us so they can make even MORE money off of it."

Quoting: **CosmicHippy**

The US government has some storage area at Ft. Knox. They may or may not have gold stored there, and they may or may not have title to that gold. But what does it matter, the US government does not cause the printing of the money.

The Federal Reserve Board of Governors causes money to be printed. (The Treasury runs the actual printing presses, but so what, they run them if and only if the Fed tells them to.) As I remember some testimony to Congress, the Fed Board of Governors has no gold.

The Fed member banks may have gold. The NY Fed has the most gold in storage by far, in vaults under its building at 33 Liberty St. in Manhattan. They do not have title to most of that gold; most is owned by foreign entities, according to the NY Fed.

So to summarize, it seems to me that US Treasury gold in Ft. Knox is irrelevant because the US Treasury is irrelevant.

But the Fed apparently has little gold either. Maybe they don't believe much in gold and are bearish on it. Seriously. I don't know, but unless there's some gold they are not telling us about, the Fed is not a very big owner of gold.

Correction: I meant Federal Reserve Regional Banks above (NY Fed, St. Louis Fed, Kansas City Fed, etc.) not the Fed member banks (Goldman Sachs, Morgan Stanley, Citi, Bank of America, etc.)

By the way (and off topic), these days, Fed member banks are not just US entities, but many financial institutions around the world. Candace seems right, they are acting as the WORLDWIDE central bank, and moreso than in the past.

So, the 'solution' according to you 'spiritually' advanced posters is to spread information until people just wake up and stop using any type of money.

Brilliant!

I am sure it will work out fine. By the way, how are you guys paying your internet bill?

Spiritual currency?

Ron and others, please, tell me how you pay your electric bill with some other form of money (not the evil Federal reserve money). Do you have a mortgage or ever had one? 100% Fractional reserve banking.

If you really practiced what you preached, you would be living in a cave somewhere without accepting any benefits of the evil FED, yet here you are.

NO that is not what we do, we post it because people do NOT KNOW. Getting off money will have to be the requested creation by the many people and while the global committee of 300 still does its shit, you can do nothing. But you CAN KNOW THE TRUTH AND HOW IT WORKS. So stop the shit posting, OK. This planet is going to be supervised by a team from heaven after the long stasis, and the people educated and when they desire to give up money, they will be helped to do so. It is not under the Lucifer folks anymore in any way after stasis and the big cleanse.

All advanced planets give up money, always, but at the same time, they also control their numbers and other spiritual tasks. You cannot give up money on such a backward sphere as this world is. When the brotherhood of man under the Fatherhood of God develops FINALLY on this planet, it will become EASY to give it up. NOW PUT ON THY MIND complete with thy imagination and figure it out. It is NOT impossible unless you are not a creative thinking person.

The planet will be eased into the proper trading methods which does NOT mean you have to take chickens to walmarts to buy clothes, OK.

**The FEDERAL RESERVE, NOW LISTEN UP because I have taught this constantly here all**

over this forum and I know of what I speak, IS NOT THE Private Central Bank of the United States. It is the Central Bank of the WHOLE WORLD. It is run by the Committee of 300, chaired by Queen Elizabeth. Now that you have read and understand this, revise your thinking. Yes they have a us of a subdivision, but that is all. The Committee of 300 Runs the Financial World. PERIOD. Except some countries are forming a coalition to change that. The us of A is not one of them. The US of A, is IN FACT still a BRITISH COLONY.

Social security system is being spread world wide. Many countries now issue social security numbers and have identical taxation set ups for the most part. Identical enough. Most countries now have social security disability and retirement.

In some ways this is Ok, because the global FED will easily be changed over in due time, under the hierachy to the global use of one currency, which will stop the trading in money that is used as a war tool against countries and as a way for some to get rich without effort. It will solve many global issues including the use of people being paid next to nothing in some countries with different currencies, while the corporations profit on their backs.

...just sitting here reading while my mind wonders of into a world without money.

...one of the concepts of unconditional Love in action...why is it so hard to understand?  
A world without money would benefit Humanity & Earth, beyond imagination.

Is it the lust for having power over someone else?

The pride one gets when saying: I worked hard, I earned to have this, whatever >this< may be. Is it because the norm of people identify themselves over/through their possessions? Like saying, the less one possesses the less one is worth? Why do we measure, why do we judge? We cry out for freedom and Peace, yet not willing to grant the same right to our next door neighbor. What exactly is it, that we seem to fear so much?

...if I remember right, a great individual once taught us to: " Love they neighbor as thyself."

...and NO...we can not go on any longer pointing our finger at the "bad ones in charge", while "self" doing nothing to change for the better.

Thankyou, keep up the "rattling" the world is in need of it!

Peace & Light to all of you 🌸🌸🌸

Hey Ron, US Treasury Notes are backed by Gold, 300 million in Gold coin, to be exact.

I only use US treasury Notes for all my transactions. So do many others.

My questions to you are:

Have you, on the record, demanded lawful money at your bank?

Have you restricted your deposits, withdrawals and transactions be done in lawful money?

If not, why not?

If you are an attorney, you certainly know how to reserve your rights via restricted endorsement (signature) and demand your right to lawful money?

Thanks :)

Quoting: **notice that. 13870395**

How do you get US treasury notes? Most of them have left circulation since Kennedy had some printed. If you go buy something and are given change, you'll get FRN's and what do you do with them? If you demand treasury notes at McDonalds or Walmart, they won't have them and will look at you like you have three heads.

Candace, I made the following post right after the one you quoted, supporting the idea that the Fed is worldwide. That means I agree with you, but it also means that nothing in my original post contradicted it!

Correction: I meant Federal Reserve Regional Banks above (NY Fed, St. Louis Fed, Kansas City Fed, etc.) not the Fed member banks (Goldman Sachs, Morgan Stanley, Citi, Bank of America, etc.)

By the way (and off topic), these days, Fed member banks are not just US entities, but many financial institutions around the world. Candace seems right, they are acting as the WORLDWIDE central bank, and moreso than in the past.

I was refering to PUTIN, the poster I was replying to AC 1492246 , the flag says he was from Russia. Obama is a cyborg, not fully "real" and is only a controlled speech giver, with NO power to do anything. Putin is not a cyborg, and is the real deal and cleaning the remains of the Bolsheviks out of Russia and also keeping todays modern zionists bent on destroying Russia at bay. Putin is a Christ. (not "jesus christ people, christ is not a last name, its a state of being). He incarnated there to cleanup the destruction to Mother Russia and is doing WELL along with others who came in support of that massive project from God. Even Edgar Cayce told that Russia would save the day in the end, or something to that effect.

 France

04/23/2012 04:32 PM

Here in Paris, France for the week on holiday. One of the things I admire about France is the DUTY they have maintained to their citizens by not allowing them to be able to mortgage beyond the appropriate level, roughly 30%, as with the UK and America, who allowed those to leverage all of their worth and in many cases well beyond their individual worth, leveraged to the hilt, only to come crashing down and en masse, affecting society as a whole.

Thus with the coming down of the worldwide mortgage bubble, France has fared much better than other countries now in more serious trouble, holding stronger with a people that have were spared from falling prey to the greed of bankster-controllers. France is an incredible society of culture and an example of a government with a sense of social responsibility.

*Something GOOD is about to happen*
