I have been meaning to start this one. I do not feel good today (or yesterday), going back to bed.

But the point of this one briefly, are your strongly held beliefs about Money, personal income taxation, other taxation. Have at it, and I will check this later. Gotta get it going. This thread is the continuing process explained here, just a new topic. [Thread: Pondering One's Convictions](#)

It is NOT Rude of me to ask that on this very confused world, that it's citizens stop to think about what they carry around as "truth" that is indeed BLING. It is the time of the blind leading the blind and the internet makes that easy for everyone to get on their soapbox. This is not a bad time, but you must take responsibility for what YOU create, and be careful not to pass on the BLING as "truth." INSPECT everything, thus you can consciously grow your MIND/SOUL.

Immanuel said 2000 years ago: "Truly, I say to you, wisdom must be learned from the laws of Creation, which humans may recognize in nature. But if humans do not think and seek, they will not be able to attain wisdom and will remain fools. There is no higher happiness than wisdom, no better friend than knowledge, and no other saviour than the power of the spirit."

To Consciously GROW yourself, to have desire for knowledge, is of GOD. It is what makes you in fact, a SON of God. You are to develop your GOD MIND. THAT IS YOUR PURPOSE for YOUR LIFE ETERNAL. ALWAYS the continual Development of FIERY INTELLIGENCE, centered in heart. There is no other way to God KNOWING in fact. BELIEFS are POSTULATIONS, NOT KNOWING.

Remember always the FATHER is WITHIN YOUR MIND and always available thusly to YOU without any intercession from another.

My personal teaching and commentary on GLP may be used freely anywhere. NIP (Candace)

Since we have taxation without representation, then you can figure out my response.

As Jesus stated:" Give unto Caesar what is his and to GOD what belongs to HIM"....paraphrasing some.

That means that GOD created this land and we have a RIGHT to property. RIGHTS should NOT be taxed.

Guess you know how I FEEL!!!!

I wonder how God would feel about 'giving unto Caesar what is his', only to find out Caesar was funding ABORTIONS, and illegal gun running operations resulting in abhorrent murder sprees, and a phony 'war on drugs'....etc.

At a certain point, I feel WE are responsible to NOT continue to look the other way....REGARDLESS OF THE OUTCOME TO OUR OWN PERSONAL FREEDOMS! We will all be held accountable, in the end!

Come out of her.....

11/01/2011 06:43 PM

First off.. Brief and Walkers. Interesting characters. I often wonder their intentions and allegiances. I'm sure they'll be around.

Second off. Religion. Can we leave that out of this?

Third off. Greed. Nothin to be done about it. Not until people begin to truly understand physics.

Fourth. Work (and/or value). These are the most important topics of discussion I believe. How do we value our work and the rewards? How is the current system impacting these perceptions? I think there you'll see where the problems lie.

Fifth. Energy. Its everywhere. What is our relationship to energy. AKA third point, but worth reiterating.

Spirituality might belong here somewhere, but to the point, I think we need some serious reevaluation of money and value. I personally feel if we understand the above things properly, we will begin to see that alternatives exist that are outside the current dialogue, even around pseudo-onetime-fringe sites such as this.

Is money necessary?

Quoting: **Nobody in Particular**

Yes, humans by nature are lazy...if everything is handed to us, then no one will work, and we'll be like the starving in Africa that sit in the dirt swatting flies all day...

Quoting: **BRIEF**

brief, nothing can be "handed" to us, without somebody working to make it. If africans want to eat, don't they have to work to grow food? where is the money necessary in that. And why are you concerned about African's swatting flies while sitting in the dirt? If they were left alone they would figure out how to eat just fine, wouldn't they. Why do you have these convictions about Africa that you tie into money?

11/01/2011 07:06 PM

Is money necessary?

Quoting: **Nobody in Particular**

The standard justification of money is that it's a medium of exchange and a store of value.

Current debt-based money is a rather weird store of value. We could do without that. It's effectively a bet (or a claim) on the productivity of other people. Clever, but a bit slave-like, no?

As a medium of exchange it is convenient. If an adequate system can exist without money though, we wouldn't miss it too much.

The cons are more serious than the pros. The cons are that, through financialization, some few people are able to put almost everyone else into enormous debt. Efficiency isn't worth that.

Quoting: **BRIEF**

And yet they survive.

*The basics ARE handed to us.* Yes, to you too. Do I go and make a hamburger? No, I take some natural ingredients and transform them into a hamburger. For me to claim that humans did the most important part of that work would be ridiculous.

The basics are adequate to support us on this planet. They had better be, because we cannot create basics ourselves. When we try something like that with nuclear power, we take enormous risks.

yea if we weren't so reliant on the money system then there wouldn't need to be so many useless jobs. if we can learn to make full harmonious use of what was always available to us then slaves would no longer be necessary. people could spend their entire lives swatting flies if that is what inspired them. Just imagine how much more we could accomplish if we spent our entire lives doing whatever it was that inspired us? ultimately, that's what all cultural/societal (conscious) evolution has stemmed from. everything that exists that is preventing further improvement stems directly from greed and jealousy.

Quoting: **Anonymous Coward 1474347**

that is the goal. In fact, on planets without money, and who are spiritually past being part of a feudal system, have to work a lot fewer hours to sustain their societies and thus there is much more time for living in an inspired way. And the necessary jobs inspiring too in general. MOney in fact, as used on this planet, keeps you feudal slaves.

Man is to develop more and more robots for doing the work. Robots don't need pay and do tedious manufacturing jobs. This leaves the truly inspirational jobs. It is terrible to spend a live sorting beans, like some african women do so we can have coffee, as a small example of spiritless jobs that are forced on people. And they lesson housekeeping too. So there is then an issue, what do you do with all that spare time? LOTS.

Quoting: **Nobody in Particular**

It's widespread.

Some people have always survived by getting one on others. Some make a living by doing so. Some people just do it because they like to be manipulative.

People who can live in a world without money:

Then there are others that really do just trust or/and do good.

Others aren't smart enough to get one over on another.

And others that believe something can be better than money in this world and can be clear of greedy mind if they know this is the destination if they're not already clear of greedy mind.

Corruption is like a virus. There are so many people who start out good natured (sharing). Then are taught (usually at their jobs) to "sell" and overcome objections of others. This is a form of controlling other people. To be successful there is selling involved in almost any type of job.

I don't really like this about our world.

No money, no barter, just working for the greater good of the community... Well it can be done if we built a new society from the scratch and with people with a new mentality, who are not willing to take advantage down the road. So, yes it is possible if we change the society structure and if we change people mentality. Otherwise with the same society and with the same people, it ain't gonna happen. It's not about money, it's about the right structure and the right mentality (you can call it consciousness).

The money system to enslave the humanity was created by Anunnaki. They created this monstrous system to enslave the people of this planet. The Illuminati, Rothchilds, Jesuits... they are just the minions who in turn have their minions. If I were a high celestial being, I will go after these guys and punish them the hardest. Why? It always amazed me how the person who trigger a tragedy is always forgotten and those who reacted to the trigger are punished, are the center of attention.

And another one: ok, they make money out of thin air (just printing) lend it to us and we give them back, plus interest. But, they give us paper and we give them back paper. Where is the winning! The trick/answer is the LABOUR, our labour that comes with that. That's where they get us. That's why the corporation are so powerful and any bank leaders have stakes in the big corporations, that's why they don't pay taxes, they have big priviledges and lobby access, that's why... you name it and they have it. The money are just the psychological factor to distract us from the real deal - our labour. Without corporations to get our labour/services/inventions, the money deal will be zero. Remember, they give us paper and we give them back paper. What is the biggest crime in our society: to break a bank or to print 'fake' money... and of course not to pay taxes. Because if we do that we don't have to work for them.

No personal income tax.

A flat 10% tax on products and services other than food and water, purchased outside of restaurants, is more than enough to go around for a limited Government.

As far as money goes, interest needs to disappear within society, therefore Banks cannot be profit based...therefore any creation of new money should only be done by Nationalized Banks.

Money created which goes hand in hand with a country's GDP potential.

No forced taxes, therefore no income tax. A flat 10% tax on products and services other than food and water, purchased outside of restaurants, is more than enough to go around for a limited Government.

Quoting: **ByYourSide**

yes it is. more than enough. They tax you to support their wars.

What is wrong with the personal income tax, is that money you earn from your labor is your personal property which cannot be ethically taxed at all. If they can tax it each year, they can tax your couch, TV, bed, and such each year. Please don't let them do that! They already tax your car each year and your home each year which are also your personal property. Gasoline sales tax (based on the flat rate that is applied to all sales) is enough to cover the roads. And those that drive pay that cost. Those that don't, don't pay for it.

Sales tax paid when you buy the car is enough to cover a variety of expenses. You do not have to pay a tax every year on it.

No personal income tax.

A flat 10% tax on products and services other than food and water, purchased outside of restaurants, is more than enough to go around for a limited Government.

As far as money goes, interest needs to disappear within society, therefore Banks cannot be profit based...therefore any creation of new money should only be done by Nationalized Banks.

Money created which goes hand in hand with a country's GDP potential.

Quoting: **ByYourSide**

money was originally intended to be issued by the treasury through treasury banks. People do need to LEARN that the FED is PRIVATE. Also you ones need to know that the FED is not the central bank of the US of A and never was. It is the central bank of the central banks of the other nations.

Corruption is like a virus. There are so many people who start out good natured (sharing). Then are taught (usually at their jobs) to "sell" and overcome objections of others. This is a form of controlling other people. To be successful there is selling involved in almost any type of job.

I don't really like this about our world.

Quoting: **D'Light**

We are only forced to pay for income tax because we are owned by Banks from birth.

Try to get a glimpse of your original Birth Certificate and see how many Banking transactions have been made under your name....

We are all products living under Commercial Law or Admiralty Law, hence the reason which

explains why our names are always written in capital letters in most Government official documents.

This is a great little website which sums it all up quite well : [[link to natural-person.ca](http://link.to.natural-person.ca)]

From what i have read NIP is the only one that seems to understand that money does not create the stuff that surrounds you. We dont need money to exist. Anything can be created if one needs it. Each one of us have unique gifts in creating and we can use that to supply what we need to each other. All u have to do is go to the stores and see everything that is just sitting around wasting space and resources because of greed. All that stuff is created with no money. The

people need to realize that.

Don't you think that if we want to keep money that a better system of production would be created so there won't be waste of resources. I preferably would like to see money disappear but I agree with another post saying that man's consciousness is what needs to change. The coveting of an object needs to be eradicated. Money in itself does not do anything same as a gun. Once the person picks it up and uses it in a manner to harm then you can imagine the rest.

my belief is that the illusion of money is a creation of evil. It is a nasty game of control and enslavement played by a small group of individuals. And we fell for the trap. Man, male and female, need to awaken to the illusion that has befallen us. The illusion of placing value on an object that has no value.

First off, our money system isn't money, it is private credit. Money is a store of value, our Federal Reserve Notes do not hold value. The FRN has lost 97% of its value since 1913 (its introduction). Article 1 Section 10 says No states shall make anything a payment of debt other than gold and silver coin. It is plainly obvious that it is unconstitutional for states to use FRNs. No one challenges the states with this, but the constitution is the highest law of the land and it renders in contradictory laws void. No that lease taxation. Taxing income (wages really) is also unconstitutional. The Supreme ruled so in 1895. Wages are personal property and owning property is a God given right. The private credit was introduced to side step this issue. Private credit can be taxed. But like I mentioned, States are absolutely forbidden to demand, make or accept payments in FRNs. They need to be challenged on this with jury trials. Judges are paid by the state, juries are also victims of this bull shit!

Oh what we could do without the limitation of money, lol try living on a pension for f's sake.....it brings into focus as to what is really important!

Money was a symbol of giving, which equates to why there so much surplus amongst the rich, and not amongst the poor.

The very collective spirit is still poor at the concept of unconditional giving and fairness and SHARING!

I am not happy about my taxes being used to kill generations of us at all, totally opposed to this in ANY form.

I would love nothing more than a world without money, I think they call it paradise when we work for the good of all and the wellbeing of a planet that has been a GIFT to us, not a possession.

I have been unwell for the past three years, gladly I got sick as I was an employee at a bank working in credit cards servicing. As I started to read the journals, I realised what I was a part of and could not continue my work on the grounds of what they were doing to us all, I also met a fine young lady co-worker whom I found was from Palestine.....I thought how could they do this to a soul. let alone a very attractive young lady! (Lol).....

As I say glad to have gotten unwell, no longer working consciously for these pricks, this world will make you under said current dark manifestoes.

But hey, sleeves are rolled up, awaiting orders and plans, willing and able and desiring to rebuild from the ground up.

Lol some days without a T-shirt and just pants lol!

Anyways, thats Aussie humour for you.

Next time I'm on I will detail the horrendous working conditions inside corporate Australia for you, one word, inhumane!

Kindest Regards,

Brendan.

Should your personal income earned from your labors be taxed? Please state your conviction on why or why not.

Quoting: **Nobody in Particular**

No personal income tax is just flat out theft plan and simple. You can't just take someones hard earned money and give it away.

Quoting: **patdeez84**

then is sales tax a theft, your hard earned money pays it too. I am trying to get at an important difference here in taxation if we have having to deal with money. Is there a philosophical difference between a sales tax and a personal income tax?

Quoting: **Nobody in Particular**

no, there is not! this is not rocket science people! I wholeheartedly agree w/NIP!!

it's even hard to discuss because it is so plain for me to see that, again, it is NOT needed period.

when i, as we all do, look around and see and live and deal with the seperation caused by money it makes me sick! this world currently is fucked up! bottom line!

to say that you are any better than another because of whatever, which is what money does, is wrong!!

how do WE fix this?

So many years have gone by with our current set-up that we loose sight of how life could be without money. What a wonderful concept. Could it be that this was how life was intended in the first place. I'm for it. Why can't we work to give it a try. We are more powerful to effect change than we realize.

Anonymous Coward

User ID: 4492169

Is money necessary?

Quoting: **Nobody in Particular**

Yes, humans by nature are lazy...if everything is handed to us, then no one will work, and we'll be like the starving in Africa that sit in the dirt swatting flies all day...

Quoting: **BRIEF**

And yet they survive.

*The basics ARE handed to us.* Yes, to you too. Do I go and make a hamburger? No, I take some natural ingredients and transform them into a hamburger. For me to claim that humans did the most important part of that work would be ridiculous.

The basics are adequate to support us on this planet. They had better be, because we cannot create basics ourselves. When we try something like that with nuclear power, we take enormous risks.

Quoting: **Anonymous Coward 573600**

It is a sad state of affairs indeed when people have been convinced that what is provided for them FOR FREE by a planet of abundance SHOULD COST US something because a corrupt group of people want to sit on their ass doing nothing while everyone pays them to live just because they have the money and the guns to enforce its bullshit civil rules.

Brainwashed western sheeple like Brief here have been taught to think that everything should be traded through money, and yet they do not understand how their property is being systematically taken from them by the eroding value of the money they use, because they choose to believe the lies fed to them by the corrupt system controllers because that is easier than standing for the truth, isn't it Brief?

We speak as we are Brief, if you could not handle abundance properly because you would choose to be lazy and ingrateful, then of course it only makes sense that you would psychologically project your own failure onto the rest of Humanity in the hopes that they would fail, because misery loves company, right?

It is better to leave your mouth shut and have people wonder if you are a fool, that to open it and remove all doubt.

Should your personal income earned from your labors be taxed? Please state your conviction on why or why not.

Quoting: **Nobody in Particular**

No personal income tax is just flat out theft plain and simple. You can't just take someones hard earned money at gun point and give it away.

Quoting: **patdeez84**

But the government does this all the time, and it is not theft, you know why? Because ignorant people accept their judgement instead of rendering their own, because that is how they have been programmed, and it is so much easier to go along and only get raped a little bit, than it is to raise a stink and have to fend off their attempt to rape you a lot, isn't it?

Money is medium of exchange we use...without benefit to society in some way, we don't earn money to exchange for the goods and services that we don't have time to do for ourselves...

Quoting: **BRIEF**

Again playing the fool Brief, you must like looking like an idiot in front of the world.

You are really saying that there aren't people who get paid money for doing something that is actually detrimental (without benefit) to society as a whole? Are you fucking retarded, or just completely blind? Money is a tool that is currently used to fund WORLD WIDE WAR and you are here saying that the exchange of money can only happen if it is done by the intention and experience of benefitting society?

Wake up man, seriously.

Taxation is theft. Any transaction that isn't voluntary with one party having guns is armed robbery. If it was voluntary there would be no need for the armed thugs. With that said I don't pay taxes because the USA is a terrorist state.

Quoting: **Anonymous Coward 1829781**

Paying taxes is only voluntary for a Sovereign, not for a citizen. It doesn't matter that there is absolutely no statutory rule stating that a citizen must pay tax, their military tribunal courts do not focus on truth, they focus on creating the predetermined outcome of the case which they have decided on before even seeing all the evidence. If you hired a lawyer to fight paying taxes, you already lost because you clearly understand how the legal system works.

The bottom line is that our global money system is almost completely self defeating, because the fact that it charges interest while lending out debt. Most sheeple ACT like money is God, hence why they are suffering more and more as money erodes their life exactly like it was designed to do.

People lived here before there was money, and did just fine, so it should be clear that money is not necessary. But like any tool, money is useful, and all we really need is to step up as a global whole and agree that the terms of use attached to the global money supply are completely corrupt and no longer agreeable with the majority of the people on this planet, and for that reason we need a new money system to go along with a new way of doing politics and a new way of administering legality and Law.

What is it going to take for the world to come together enough to make this happen?

Quoting: **Anonymous Coward 4492169**

Why do people continue to support a money system that depends entirely on their faithful use of it, when that system is deliberately designed to implode and transfer all the monetized physical wealth into the hands of the bankers in exchange for NOTHING but a slight bit of monetary administration? Are we really paying the bankers to take all our stuff just because we are too lazy to figure out how money is using us as we use it?

And how can anyone continue supporting politics as a whole when its primary focus is to continue feeding the beast that is our corrupted money system?

Ignorance is only bliss when your definition of bliss is being raped repeatedly for your ignorance.

When will people wake up enough to realize that we have way more than enough (if it wasn't being hoarded by people with way too much money to do so)? When are we going to demand new terms to the agreement of how we are paid for our labor so that we are actually paid something of real value, instead of the self defeating fiat crap that passes as money?

I don't work a job because I personally will not accept money as payment. Why would I accept debt as a payment for my real world time labor? Why would anyone? Because all there is? Scarcity mentality is self defeating, what will it take for people to grow up and start acting responsibly when engaging in commerce?

a heartfelt hello,

everything, and I mean everything that one can only imagine not to agree with, because of its evil, immoral, inhuman and unworthy to life nature, is injected through tax dollars. Everything bad has taken its way into reality by tax money.

We are all (unwillingly) plaintiffs and defendants at the same time!

I hear people say that they are against war and poverty, but the same people (all of us) make these wars and famines possible, through their tax dollars.

In this respect we are all criminals. We contribute to the fact that everything we reject with all our hearts and deepest convictions become our own daily affairs, through taxes.

How often have you been driving down a street and you thought: "Damn, that pothole should have been repaired years ago, what are they doing with my tax dollars?"

How often have you been excited about the miserable education system at your school?;  
Should not tax money be used to improve the same?

Don't get upset, that pothole will continue to greet you when you go past it and the education system will become even worse.

If you should ever become so keen to ask them, you know their answer already in advance: "We are sorry, but to bring these things in order, we need more tax revenue!"

Do we need a "cash value system"? No!

Do we need tax levies? No!

What do we need? Confidence, Confidence in our self's and in our abilities. Confidence in our fellow human beings and their skills.

To break out of the existing tax system, foundations / family foundations can be established, then you determine how your money is used. This is just one example of many.

To break out of the money value system you can make small community initiatives.

Make your skills available for each other, trade skills/work for stuff you need.

These are good exercises to learn how to let go of the money system and you will be surprised how good it works ... without money!

I have done and still do these things since 2005, it works.

GOD BLESS

In other words,

until you prove you are not a corporate citizen by proving you are a Sovereign, the IRS assumes you to be the former and the court goes along with that.

Part of me agrees with this, part of me thinks it is a dishonorable let down of the courts to not help people understand the difference between corporate legal obligation and sovereign lawful

responsibility. Perhaps our courts are not as educated about law as they should be? Or are they simply bought out like the politicians who fill our school curriculums with garbage, or the msm editors who fill our airwaves with useless dribble?

No to tax , paying taxes means we are supporting the needs of those darn people in the government to live in luxury and making us their slaves.

Is money necessary?

As of today it is. But we can go back to old times where we use the barter systems. Goods in exchange of goods or services. I am living in a simple community although we still need money here but most of the time we are sharing goods and services with fellow men free of charge. So if everybody learn to plant their own food and not depend on supplies commercially we can limit the

use of money and soon eliminate it.

Ok perhaps as a way to better image, assume our planet were OFF money now. You would still have jobs, and consume stuff. What would be different if it were the case now. Beloveds were are not going back to the days of small farming societies living of the land. MAN must progress into the robot stage etc. We are not moving backwards.

Pretend you are living without MONEY NOW as the world is and then write about how that might be working.

Quoting: **Nobody in Particular**

Hi Candace and lots of Love to all of you

I think to eliminate the thought of "one has to make profit", and "one has to earn its living by making money", will be the toughest solution for most folks.

If everything was given to everybody for free, we would not need money at all. One would still have housing, computers, food etc.

One Example, just happened to me & my family a few days ago.

We exchanged our skills with a small IT-business in our neighborhood. They are Genius-type of people, inventing marvelous solutions for IT Problems...but they are unable to build, thats when we came into the picture. We build what they invented, therefor they filled up our oil-tank. The fuel- oil-supplier needed a different IT system, (he was complaining that he gets sick of the waves, the antenna on his roof was giving out)so he got a new Antenna with much more up- and downstream, working with only 0.005W.

So what happened?

We was in need for Oil, but didn't have the "money" to pay for it.  
Our neighbors was in need of someone being able to build what they invented, because they couldn't do it.  
The Oil-supplier was in need of a better IT-System to avoid from getting sick.  
Between the three parties no money was involved.

Now.....if we all could eliminate the thought of greed and envy,  
we would not even have to make use of trading knowledge and skills, in order to get what we all need and want.  
Everything would be available for everybody for free. Simply because we all would wish only the best on and for each-other.

Thats the world i want to live in.

GOD BLESS

yes as to the story above, you bartered and that was good. However, money was required before  
the oil got delivered and so on and so forth. Somebody produced the computers etc. Now I need  
all of you to step into pretending were do not use money now.

HOW DOES EVERYTHING REACH YOU that you use? You cannot barter locally for everything.

Money isn't going away. Obviously way too many people and way too much of our economy is  
based on the trade of money, and there's no reason it shouldn't be.

Except of course for the fact that a very few people at the top have dictated the terms of our  
money use and by those extremely unjust and inequitable terms, the majority of use bear the  
brunt of the entropic errosion of the purchasing power of that money, simply because it is a  
system that is designed to bankrupt the many so the few at the top can hold control of the many

by the illusion that we need money to survive.

Bartering is entirely possible for individuals, but it doesn't work on the large scale because it is simply too time consuming, as there is too much transport of physical goods required. Maybe if free energy and hovertransport technology wasn't being hoarded behind patents, that wouldn't be the case, but that is another thread topic.

The simple fact of the matter is that if we simply stopped paying taxes for interest on the loan that our govts take AS every dollar they spend, we would have more than enough money to expand our economy and be able to provide more goods at a higher quality to more people for way less resources to produce and transport those goods than is currently required.

But, the govt is NOT going to end the war against its citizenry UNTIL most people stand up and claim a higher jurisdiction that statute legality. We must step up and at least claim common law Rule of Law. If we don't do that, why should the govt/military trust us with technology and power that can easily be weaponized?

The self defeating money system that was put in place a hundred years ago was done so for one overriding reason, to give people THE REASON to come together, and agree that a world working by benevolent self-reflecting service to Divine Will is the only way we can genuinely transcend the lower consciousness of yesteryuga.

to give you an example of why money will never work, its PROFITS. You see today because I wear out keyboards, I checked into voice recognition software and the rep insisted I must buy a head set and a plug in microphone to do that and he still never understood my questions about where this shit would allow me to post here by voice. I would be spending several hundred dollars and still don't know if it would work for forum posting.

He could not answer as to why the mic already in the mac would not work. Now money causes incomplete development of product. The specialist was programmed to see me more stuff I don't need nor want. People not on money seek to do things Rlght. We are not sustainable using all this shit that wears out or must be replaced as in computers because the old one doesn't have enough ram or whatever.

I ask of you ones to pretend we were already on NO MONEY and you would acquire thus what

you currently use. NOT ON POST here people. I am asking you to visualize. We cannot change this world until you can think beyond MONEY.

We could be, if it were not for the profit motive, have voice technology long long ago and computers that were already controlling your homes and at least 256 bit instead of double 32 bit. double 32 bit is not 64 bit. it is just 2 32 bit processors joined together, software is cheaper to develop that way.

You could have refrigerators that lasted hundred of years if you do not use money. Ponder it.

man would then want QUALITY. You would not need sexy new cars and sexy this that and the other. cars, which are not a bad idea, but how they use energy is. We don't have proper energy development because the thugs want to SELL energy! for profit and shareholders.

You do not need cheap trinkets form china in your christmas trees and all this other USELESS stuff.

Of course individual barter does not make a globe run. Now I am asking again, PRETEND (USE YOUR IMAGINATION) we are already off money. How does your computer and internet come to you then? Or any other product you use. You can't grow organic veggies and trade those for a carpenter to build your house, because your house requires many materials the carpenter must acquire.

you are not limited beings. put on the mind and god, and get out of your earth mind and imagine how all this can happen with out money.

The answer is not complex, it is SIMPLE.

Money is a contraction always. it is not expansive. man is supposed to be expansive. Money always collapses, even gold based money or baskets of currencies or anything else lower man dreams up to enslave himself.

the only where I have freedom is my mind. My body is enslaved by money, always has been.

If you want a college education why do you have to slave at shit jobs to pay for it, or pay back a high priced student loan created from thin air? In the US of A we have serious infratructure problems that cannot be fixed because there is not enough "digital credits or paper bills" to do it?

you can't have enough quality education because of the silly money system? or anything else you desire?

Did you know getting off of money will free up hours of time? It will allow for the full development of robotics to do much of the work? oh but some don't lik that because it steals away jobs?????? excuse me but normal man desires to do away with jobs. That is a great vision. people should NOT have soul killing jobs on assembly lines for example.

AS LONG AS MAN BELIEVES HE NEEDS MONEY, HE IS DOOMED TO KEEP HIMSELF ENSLAVED TO IT.

If I am in a warm region, I would just need a tiny wood house enough space for a bed, a table and a couple chairs. These can be made from wood. I can ask my neighbors help me build these and I will help them build theirs.

I'll plant my own fruit trees, vegetables. I'll change to raw diet if I have to.

We'll have to live united and work together, then share stuffs. Who can teach will teach kids for free. Who can design will design stuff for free. Who can farm will provide food to others so they can create or teach your kids. Anyway, it have to be a community life and have to base on love.

No matter what, to have this system successful, we'll all must have high spiritual level or else the greed will get in and All will fight to possess materials again!

OK, i give it another try, although i think I'm a little slow in the head today.

Please forgive me, I'm thinking loud now.

Living without money means: no profit, no greed, no jalousie, no manipulation, no Fed, no War, no NWO, no corporations, no pharmaceutical lobby, no slavery, no "third world", no mass-production including Food, etc. etc.

My Goodness, that would mean at least 40% less stuff produced, because there is no-more need for it. That also means 40% less waste, 40% less taken from our environment.

All beneficial inventions which are now still oppressed would be accessible, like free energy, just to mention one. That would make at least another 40% less waste.

It would end poverty and pollution right away.

It would also end labor.

To live without money means, one of the largest separation factors were eliminated. We would feel and act much more as ONE.

We would have so much time on our hand to use for our spiritual growth. We could easily learn how to consciously create by thought.

GOD BLESS

I think the only way a system without money would work is if we had a major change in our thinking from a "me" to an "us". You could still have all the satisfaction in doing a job well and probably even enjoying the work, but now you are concentrating on what everyone needs instead of having to focus on what I need (money). No more corporations and stockholders to satisfy. No more having to make the numbers every day for someone far off behind a desk. You'd be set free with time left to live.

Dear Candace,

i have a serious question that is bothering me for a long time.  
How can living without money be done?

As i stated before i try to cut down on it as much as i can.

But I'm only one person/family and there are 7 Billion people out there?

We lost our family business for saying no to our corrupt tax system. Don't get me wrong, i have no regrets about it. But there are so many regulations here in Germany, People are simply afraid to do what they know would be right, because you will get jailed for doing so.

So how can this be done? We don't have until forever.

How can I/we take the fear out of peoples heart?

Trying to be a role model does not automatically means to have a lot of followers.

Lots of Love to you

abolish income tax. slash the size of government by 90% and let the chips fall. make government positions voluntary. allow for anonymous donations. outlaw lobbying and put in place laws that punish severely anyone who tries to change it or bring in any liberal philosophies. provide people with a means of producing their own food so no one has an excuse to take a hand out.

eliminate welfare programs altogether. this will force people to work and families to stay together.

outlaw fraternities. deport any violent criminals to the arctic. institute an online voting system as well as give the masses an easy way of removing crooks from office. perhaps a shock collar for politicians that is tethered to an online voting system. money is not bad, people are bad. we could get rid of money if people had any level of enlightenment but we all know that will never happen.

so we need a system in place to keep the fools motivated. non-diverse countries could make it w/out a money system cause they would all be working toward a collective agenda.

multiculturalism has failed.

it has to be dropped globally and you would live like you live now. NO real difference, except you wouldn't be running to the bank and paying bills. That is why I said its not difficult. We would have honest corporations that managed the movement of goods. you would have the same jobs, except there would be no banking jobs, regards money. Everyone would work at something unless bed ridden or otherwise incapacitated.

Since there is no money, nobody owns anything. If you change jobs which require a move, you go on a list for housing where you need to move to.

Housing is based on size of family and other needs and on planets off money, housing is generously comfortable. The inner earth folks are not on money and if we were to go to that they could provide advice.

it is NOT used on any of the architectural spheres of heaven. Yes you work in heaven too. Eternal life is not about floating in some bliss. Everyone works, the angels that guard you are working. one never stops contributing to the creation.

On this planet, if it was now, we would not be importing cheap chinese art and the like to the Us of a. People would work far less hours and have a great deal of time to say, spend on hobbies. People would make and trade or give away art. Hobbies seem to be going by the wayside in my own country, and that in indeed sad. the hobby stores here in Denver has mostly shut down or carry only some craft materials, and the rest manufactured goods.

You ones think its great to work ONLY 40 hours a week. IF we could but suddenly move to no

money, we could drop the work week to maybe 25 hours. those out of work from the closing of banks, real estate agencies and the like would learn new tasks in the remaining fields of work and if we kept the 40 hour week, other fields would be quickly saturated. so you will work less hours to everyone can contribute something.

**DO NOT MAKE THIS HARDER THAN IT SEEMS. IT IS YOUR FALSE CONVICTIONS THAT MAKE IT HARD BELOVEDS.**

When we have the spiritual maturity to drop money, those going to school to educate themselves or re educate themselves, that is considered your work also.

One parent of a family of young children could stay at home, because raising children is work. This plan would in fact put many people back to work, considering the large number of unemployed in my own country. Putting them back to work at something, means everyone works fewer hours. On planets without money, there is NEVER any unemployment except for the seriously injured, elderly who cannot think any more and the like. There is always some work for the handicapped unless they are not capable of anything.

If this planet was high in light and life, with the develop of robotics to do much of the work, we would "work" for the sustainment of our societies only a few hours a week. Its not only developing robots for manufacturing, but also we would greatly improve the quality of life, food, and healthcare, which reduces the jobs and allows then more people in certain fields so hours are less.

the HUman does not enjoy 40+ hours a week of manual labor on assembly lines or other monotonous work. we are supposed to develop the robotics and also other ways of living that decrease the housework and all that stuff. Consider that your washing machines and dryers, greatly reduce that work already for a long time now, thus they are "robots"!

We will NOT eat flesh at some point, there goes some more nasty jobs. We will automate everything.

But if we could boot the thugs, and bring in some folks from places NOT using money "NOW", your work and life on this planet would lessen and become truly fruitfull, for the work necessary to maintainence of society becomes totally worthy and not soul dulling work. We can't even afford improvement now on this planet, and the reason IS, that we don't have enough paper money/digital credits. now how DUMB IS THAT?

You would still have stores, but they would be just distribution centers. You would go get food, clothing and the like still from them. Some folks will still be growing food, and manufacturing goods needed, just for maybe at this time, 25 hours a week, instead of 40 to 80 hours a week. Those poor people in bangladesh are worked half to death for make our clothes. all of that would stop. We would have new jobs to develop robots, create better housing and the like, in many countries.

Our manufacturing, since there is not a profit motive, your refrigerators and all these sorts of goods would be made correctly to last 100s of years in fact, under new free energy to run them. We would move into doing things RIGHT in the first place.

We can still have individual transportation, but cars would run differently, and would also last 100's of years. You must be above having to have a new sexy model of car all the time. They change the models on cars to convince you your old car is ugly and you need a new sexy one. Ponder that!!!!!! We wouldn't all need new spring and winter wardrobes just to have "New" either.

In fact one day, we will have shoot, the word..... anyway, machines that can make whatever food and clothing is desired right out of the etheric. REPLICATORS. You just send your mental image to the machine of your cup of coffee, and out it comes. These are common place on the higher craft around us now. Some of the folks here don't have all that stuff yet, and they grow their crops on the craft and often also trade with planets for some goods. there is trading with folks from other worlds going on in South America NOW for that matter. Did you know that?????

think of all the wondrous possibilities. Dream of what you would do if you only had to work say 20 hours a week for your society, what would you do with the extra time. Hobbies, long vacations exploring our planet, going to school, including mystery schools, and consider if we switched to going off money , and thus had ENOUGH of everything, you would live much longer and have greater opportunities to learn before passing this plane. If we could get healthy life on this planet to even 150 years, my what could be accomplished.

AND MAN loves to party on, the parties would be wondrous. We would make better celebrations of life and get off this halloween shit for example. the powers would not keep us attached to them selling us stuff for all these different seasons which pad their pockets and which are created by slave labor. right now your labor IS slave labor, even if you have a career you really enjoy. You have to always be looking at the check book balance and plan your life around it. That IS slavery beloveds. When money goes away you live to live, not to pay bills.

I mention parties above. In my country, we often have baby showers to gift the parents to be with things we buy to help them welcome their new one. If we are off money, you don't have to go buy a gift, the parents can get all they need at the distribution center. If you gift in this situation you would gift something you made for the new child! Or perhaps gift your time to assist them when baby is born, or with setting up the nursery, or whatever, if gifts are part of the deal. You will actually have time to make gifts or donate time! Ohterwise the party would be just wondrous for the purpose of celebrating the new life to come. And there will be "naming" or welcome parties after the child is born to present society with this new being, and so on and so forth about everything we do. Our parties would celebrate life much more than they do now.

even your office parties would be nicer!

Just imagine how good your life will be when TSHTF and everyone goes out of business.

Here's the simple fact that you somehow miss...

Everyone serves others. Everyone who is productive, I mean. We all go to work and only businesses who serve others STAY IN BUSINESS.

The more other people you serve at a price they're willing to pay, the more wealth you create and the more money you can have. It's the freeloaders, living with their hand in another man's pocket, who serve nobody but themselves, that are the greedy ones.

I didn't miss anything. but money must go at some time to have true equity. It is always infested by thugs. and people suffer from it. I said even you ones working, are in their pockets and that is so and many of you have no choice, but to work in their pockets because without an income you family can't even eat, let alone anything else. you are enslaved to it. You are surfs.

**And..... how many of you serve the beast and have your hands in his pockets? all of you in management of corporations serving the beast, in real estate, in the banks, in any company that considers ONLY PROFIT lines. that means many of you have your hands in the pockets.**

Quoting: **Nobody in Particular**

Just imagine how good your life will be when TSHTF and everyone goes out of business.

Here's the simple fact that you somehow miss...

Everyone serves others. Everyone who is productive, I mean. We all go to work and only businesses who serve others STAY IN BUSINESS.

The more other people you serve at a price they're willing to pay, the more wealth you create and the more money you can have. It's the freeloaders, living with their hand in another man's pocket, who serve nobody but themselves, that are the greedy ones.

Quoting: **N34444**

exactly what it says. Evolving man will give up money, there is never equity of all people on any

planet until he does. I started a thread once to talk about a society on another world that has given it up. We will develop some sort of trust/corporations to handle the proper delivery of goods globally. It is a greater challenge to do so here than that planet because all the people are of one race, "seal people" and their land masses and challenges are much different than here. But reading the book linked will help demonstrate how they did it and there is marvelous teaching because on the worlds that do this, there can also be NO DISCRIMINATION and NO manipulated religions that keep war in place. I REPLACED THE LINK HERE, I HAD THE WRONG ONE.

[Thread: Planet larga](#)

these ones work 3 hrs a day, and I don't remember if its every day or they get days off after so many days worked. I don't know if they have "weeks" there which is yet another false "convictions" that we need to have weeks, nor months period. We do have "years" obviously based on the seasons produced not only by our revolving around the sun, but because of the annual tilt changes.

Once we are monopolar and the firmament is put back up, we might not see the progression of stars each year too, so we might even drop the "year" as we won't have seasons when we are monopolar, the planet will be straight up and down.

Dear Candace,

I approve with what you say a 100%. This is exactly how I think it could look like.

The Problem is to find People who are willing to go through the "inconveniences" to bring this to life. It seems like everybody is waiting for someone to start.

I am absolutely sure that if it was known how many People think alike, this new way of living could be installed in almost no time.

Knowing this shows me how much fear and bondage is still amongst us. It saddens my heart and to tell you the truth that makes me cry out to God for help.

GOD BLESS  

Candace, I thank you again from my heart, for all your teachings, my heart is lighter now, my mind is much clearer and my once flickering light is shining brighter.

Thank you for not giving up.

To All, All taxation is the whip of the slave master. To keep us without enough keeps us working. Money is or is not necessary depending on the system agreed upon by the populace, but it must be a medium of exchange that promotes the golden rule and hinders greed, one that keeps its

value allows neither inflation or deflation.If everyone lives the golden rule and working for the betterment of fellow man and Gods Universe work of any kind is worship,and eventually if we attain this level of brotherhood in Life and Light money will be unnecessary. the white rose

Hi white rose, and yes the people have not agreed to that which was stuffed down their throats and all of us have been born IN the system and hardly can comprehend any other way. Man will have to decide WHEN to give up money in our new world, as its a spiritual issue which cannot happen until man actually does wish to live the golden rule and when he does that, it will become possible and he will prefer it.

we will always have inflation until there is NO INTEREST charged. now there is another topic that would fit this thread, INTEREST. On this one ISLAM IS CORRECT. IT is not holy to earn money on your money and this adds to inflation far more than taxation does.

So a question I can ask here, should you pay interest on loans?

The problem is not money but the human condition.

We can never have enough of that which we do not need.

With out money we will still want. This is why communism on paper looks like a good theory . But in real life practice, laziness and greed are what truly happen. With out a end reward for effort we will not reap what we sow. Others would want of our own goods produced for naught

But more to how I see it, money is not a thing to possess but free speech it self to be doled out to that which we believe is correct in life. To say how I can or can not spend money is to stop me from expressing my self freely. My time is my own and my money represents my time spent. Now money it self is not evil but how we change our lives for it is where the down fall of man comes.

Taxes? Taxes are a must but at what rate.

As you raise taxes you lower the velocity of money. When money does not change hands production falls. As production falls, jobs are lost. As jobs are lost tax revenue drops. As tax revenue drops infrastructure suffers. As infrastructure suffers the ability to produce goods efficiently collapses. ect... ect... ect...

Let the money flow lower the tax rate, the more times money changes hands the better for everyone, even the tax man.

[\[link to en.wikipedia.org\]](http://en.wikipedia.org)

So is money evil? No but we can make it evil if we choose.

Are taxes necessary? Yes but at what rate.

Can we eliminate money? Not that I can see, least not till humans change.

Should we help those who need help? That is a personal question of how you feel about those you want to help.

Most important I'll say it again, your money is your freedom of speech. It is your time spent that is put to measure and yours to use as you will! Never forget it.

Ideally economic activity will continue, with payment in money replaced by another method of exchanging as needed. That is difficult to do when everyone you want to or must exchange things with (labor for food and shelter, for example) requires money to make the deal. But if money goes, something else can replace it.

Actually I have found in life that if you give freely of your self with out want of reward that it does come back ten fold.

Example: I'm the type of guy who plows all my neighbors driveways free all winter long...not because they need it or because I want them to like me but because I have the ability to do it easily and they do not. So I could watch them all shovel their driveways for 3 hours after a storm or help them for 10 min each so they can have a good day...it's really not even a choice now is it.

Realize with the Confucius quote that what is right in life leads to better things then looking to fleece people of their money in evil ways. You can easily do what is right and still be doing the honorable things to your friends, neighbors and clients.

Getting rich is easy, but keeping your soul why you do it is the hard part. People tend to lie to them selves!

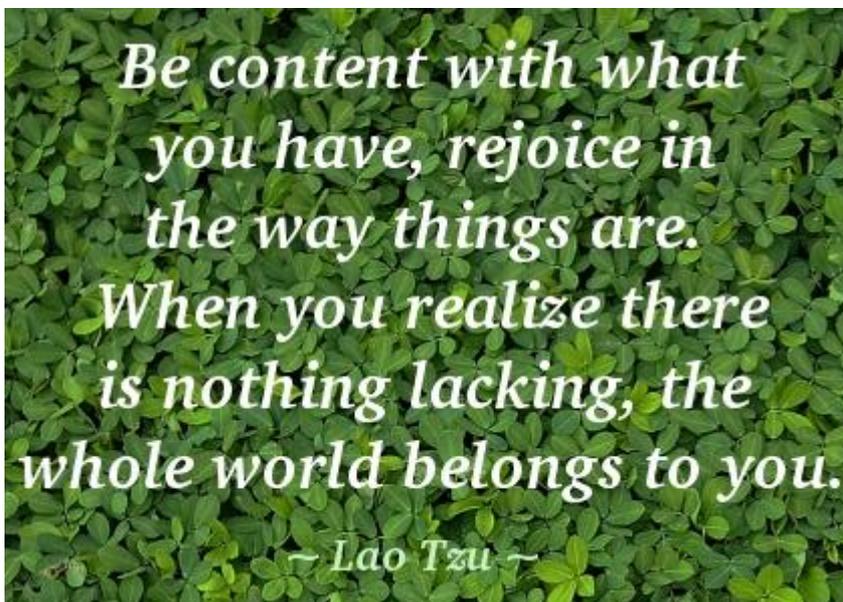

I'll right up something on interest later. But White Rose is pretty on the mark. Even though we don't like it we do have to live with in the game of life. BUT! Once we have mastered the game, we can do what we want with in the rules.

Now go live life to it's ends and enjoy it with the strength of freedom ahead of you. No one will hand you the world on a platter, but it is yours for the taking!

*Let not the fruit of the action be your motive to action. Yours business is with action alone, Not with the fruit.*- BHAGAVAD GITA

Should your personal income earned from your labors be taxed? Please state your conviction on why or why not.

Quoting: **Nobody in Particular**

no. the reason is that to tax income from your labor equates to your time and your effort having no value whatsoever. for example, if i want my house painted and offer you \$10/hour to do the work, where is the gain? where is the income? it was an even trade. 1 hour of your time for \$10 of my money. how do we know this was an even trade? because we both agreed on it beforehand. now the taxing entity comes along and nullifies our agreement and assesses your time to be valueless and takes \$3.50 of the \$10 i paid you because it was considered a gain. explain to me how that is fair. what if i traded you an apple for an orange? should they come and cut the apple in half to tax that? do they cut the apple and the orange in half to take their tax?

income taxes are a statement that the common man (or woman) has no right to live and their time and effort has no inherent value. all other arguments about this being selfishness, unpatriotic, etc., etc., are merely smoke screens of obfuscate the underlying issue. that's my personal belief.

Quoting: **Chrit**

when we are spiritually mature NOBODY WANTS beloved, when money is given up. There is always enough. Money is never truly freedom of speech when you don't have enough. That IS a journey I have taken and its not a fun place to be. When it is given, you have the spiritual energy to truly live. NO BILL WORRIES. No risk of loosing ones home, always enough food, because a cooperating society grows all it needs. When Money exists there are always takers, too many of them in fact. A society who has advanced itself to god consciousness, only knows how to GIVE. I so long for that. It removes soul killing occupations as robots are developed to do much of the work. Life becomes happy and full of play and peoples curiosities are always satisfied, there is DO MUCH TO DO and explore. What I am taking about has NOTHING TO DO WITH COMMUNISM. ANYTHING BUT. NO RELATION. On these worlds, god conscious humans do not allow themselves to be feudal slaves. They drive their own lives.

How much of YOUR LIFE is DRIVEN BY MONEY? I can tell you. ALL OF IT. What can't any of

our countries afford because of the PLAY MONEY?

Government on these worlds changes to advisory folks which are actually put in place by the people for the people. You have trusts instead of greedy corporations. You can pursue anything you want. You choose your careers, they are not assigned to you. In communism you get told what you will do. That is a huge difference right there.

Make of list, everyone reading this pinned thread tonight, of what you have not been able to have because of money. And some of you work in the money field and are miserable for it. These worlds not on money to do not ever seek war. They seek only the raising of their consciousness, the growth of their souls.

The SUPERIOR MAN who seeks what is right, will eventually seek to give up this stuff.

Is money necessary?

Quoting: **Nobody in Particular**

Yes, humans by nature are lazy...if everything is handed to us, then no one will work, and we'll be like the starving in Africa that sit in the dirt swatting flies all day...

Quoting: **BRIEF**

I don't think people are inherently lazy. I think our present-day mechanized society, our school

system, and our government handouts and excessive small business regulations has taken the drive to be self-sufficient away from many of us. You could probably add fluoride, mercury, chemtrail metals, aspartame, high fructose corn syrup and most anything Monsanto makes 🤪.

One thing you have to remember is that **we are NOT using real money these days**, anyway. Our fed notes are not backed with anything of value, except the promise of our labor. **The fed actually charges us interest to use their debt notes.** Real money, like a gold coin, would have intrinsic value and would actually be a store of wealth and value instead of a paper IOU, and would not have its value manipulated by a bunch of foreign bankers. We would not have this housing bubble if there was real money in circulation (FDR started to kill it, the Nixon finished off real money).

A resource-based economy, like those in coops, communes and kibbutzes, will have people doing work to produce different things for others in the community, then each person can take what they need for their personal needs. It can work well with small populations. This is much like bartering.

The catch is having resources to be able to grow food, make clothing and build shelter (at a minimum). A growing population and the industrial revolution turned many into factory workers without self-sufficiency. Governments swoop in and create "state" and "federal" lands which take the land out of production. Our education system seems to train workers and not thinkers.

Our ability to be self-sufficient, produce things and barter was taken away with the mechanization of society. It's hard to trade tons of lettuce for a car.

Yes, humans by nature are lazy...if everything is handed to us, then no one will work, and we'll be like the starving in Africa that sit in the dirt swatting flies all day...

Quoting: **BRIEF**

I don't think people are inherently lazy. I think our present-day mechanized society, our school system, and our government handouts and excessive small business regulations has taken the drive to be self-sufficient away from many of us. You could probably add fluoride, mercury, chemtrail metals, aspartame, high fructose corn syrup and most anything Monsanto makes 😞.

One thing you have to remember is that **we are NOT using real money these days**, anyway. Our fed notes are not backed with anything of value, except the promise of our labor. **The fed actually charges us interest to use their debt notes.** Real money, like a gold coin, would have intrinsic value and would actually be a store of wealth and value instead of a paper IOU, and would not have its value manipulated by a bunch of foreign bankers. We would not have this housing bubble if there was real money in circulation (FDR started to kill it, the Nixon finished off real money).

A resource-based economy, like those in coops, communes and kibbutzes, will have people doing work to produce different things for others in the community, then each person can take what they need for their personal needs. It can work well with small populations. This is much like bartering.

The catch is having resources to be able to grow food, make clothing and build shelter (at a minimum). A growing population and the industrial revolution turned many into factory workers without self-sufficiency. Governments swoop in and create "state" and "federal" lands which take the land out of production. Our education system seems to train workers and not thinkers.

Our ability to be self-sufficient, produce things and barter was taken away with the mechanization of society. It's hard to trade tons of lettuce for a car.

Quoting: **vor 3189404**

but in a money free global world, you don't trade your lettuce for a car. Trusts arrange all of this and some of you would obviously work in that trade, the trusts, instead of banking. There still has to be organization on a money free world for manufacture and delivery of products.

Should your personal income earned from your labors be taxed? Please state your conviction on why or why not.

Quoting: **Nobody in Particular**

I think there is a small percent of people too screwed up for one reason or another to provide for themselves. I believe we should take care of their basic needs of food clothing and shelter, and as a nation that probably means taxation, whether on personal property or income.

I pay cheerfully as to my first ten percent or so of income taxed. After that I hate it because of the waste of tax dollars on stupid stuff and the lazy people receiving benefits who should not. Why shouldn't my child receive it instead? It is out of control.

But, as a person with a christian background, I have been pre pre-programed to think that giving ten percent is expected and i am ok with that. I don't care whether it is to a church or a secular or government as long as it is used right. The problem is that too much of that is used for "overhead".

Quoting: **Nobody in Particular**

One of the things that is not so well known is that in the early days of America-and I think even till some time in the early 1930's gubmint income did not come from taxation of individuals.

It came from customs and excise thereby curtailing the ability of Companies or Corporations to accrue power and control.

As for personal taxation: I used to make jewelry.

I uuterly resented not only the liars and theieves that I was partnered with (my bad) but found it unbearable that some fat parasite in an office claimed, as a right, the fruits of my hard labour to be given to even fatter parasites to spend on limousines, designer haircuts and prostitutes.

Yes, NZ polticians are the same as US ones!

As for "render unto Caesar what is Caesar's" isn't it also stated "live by the sword, die by the sword."?

Voluntary taxation in the form of tithes or gifts is fine as far as I'm concerned.

And in this age of advanced technology and superior knowledge why the hell is anyone poor anyway?

Why yes,I forgot for a moment who's running the show.

Quoting: **D'Light**

we do have a strange idea of "success" don't we? would we re define success if it wasn't tied to income and things.

Quoting: **Nobody in Particular**

I'm totally sure success would be redefined if it weren't tied to income.

Success would be based on accomplishing whatever one set out to accomplish.

Now everything is tied to end of quarter spreadsheets and growth. Does everything always have to grow exponentially to be considered a success? I don't think so.

Quoting: **D'Light**

Would success based upon accomplishments not go to the best hunters, anglers or farmers and would those who lacked skills or motivation covet the skills of others and scheme to take them for themselves.

You could share your catch or produce with others but would it ever be enough for those who benefited from your skills and hard work.

Years ago, Britain taxed your home by the number of windows you had and rooms in your home, which is why older homes do not have closets as they were taxed as rooms. Hence, closets were removed and windows bricked in by homeowners trying to save some money.

Today we have municipalities that are seeking new ways to fleece the public take Chicago for instance who have a new plethora of nuisance taxes and Denver with their red light traps. What businesses still left in Chicago are going to start moving or close down and the tax base dwindles.

City fines and fees double, triple for minor and major offenses

The mayor isn't just throwing the book at criminals.

Allowing weeds to grow to a height that exceeds 10 inches — \$600-to-\$1,200-a-day, up from \$500-to-\$1,000.

Illegal dumping or allowing trash to accumulate in a way that provides a food supply for rats — \$300-to-\$600, up from \$250-to-\$500.

Accumulation of materials or junk on any open lot or other premises not placed on open racks "elevated not less than 18 inches above ground": \$300-to-\$600, up from \$250-to-\$500.

Failure to maintain vacant lots and keep them clear of debris: \$300-to-\$600.

Neglecting to register or renew registration of a vacant building: \$500.

The revenue ordinance introduced at last week's City Council meeting also ends the bargain fee that Chicago businesses have paid to create loading zones that tie up traffic or deprive other motorists of on-street spaces.

In the Central Business District, there'll be an annual fee of \$500 for up to 20 linear feet of curb space used and \$50 for every linear foot above that amount.

Outside the downtown area, the loading zone fees will be \$110 for up to 20 linear feet of curb space and \$50-per-foot after that.

The mayor's budget also includes a plan to raise the city's hotel tax, impose a \$2-weekday congestion fee on downtown and River North parking; double water and sewer rates over the next four years and lock in annual cost-of-living increases after that.

Denver Collects Fines On Drivers Who Stop At Red Lights

The city of Denver is bringing in thousands of dollars in fines every year by ticketing people who stop at red lights. They are ticketed because their tire goes over the white line that marks where the vehicle should stop.

Oh the fleecing in Denver is HUGE and I got a traffic Fleece myself once. Actually it was a City of Federal Heights Fleece. When I went to set up a date to fight it, the clerk laughed so loud, it was obvious I could not win, so I paid, and saved the court costs and extra points against my drivers license. MY fleece was for something I did not even do. too long a story to give out, but let me say me and the cop that stopped me, had a discussion and the supposed offense was for a DIFFERENT location than what was written on the ticket, that is why I was going to attempt to get it dropped. I did not realize what was written on the ticket when he gave it too me, I simply took his word for the place he said I committed my big "crime." It was quite some time later that I read the actual ticket and was incensed.

Let me say my issue was also where the cop thought my tires were but he could not have even seen that from where he was, he made it up. My fine was \$100. One of the reason I gave up driving in fact.

I have made the statement before and I make it again now. I have not lived one single free day on this world, in this current life.

we have similar ordinances also in Thornton where I live on weeds and such stuff. I found out when I researched that online that these rules originated in Florida and were copied over to us. In fact I have a long story where they wanted to fleece me \$1000 over a bare spot that resulted from my clearing the weeds, so I could seed grass. I planned to wait another month to seed when it was getting cooler. This was NOT a large area, maybe 100 sq feet. I had a mold problem and had been advised by the university up in Ft. collins to turn the ground frequently for 2 years to dry it, as poisons would not work and in fact make the ground even sicker. I had gone those two years, just turning a bit at a time all summer, and weeds grew back and were mowed. they prefer mowed weeds to grass it seems as long as something is growing in the direct, you can't have a little un landscaped dirt, not even for a month. I landed up buying grass that comes up in 3 days, grows like crazy and proceeds to then die. very temporary, but it got those thugs off my back.

Granted fiat currency is the norm with our government however, we work and earn money to purchase items that we require or desire and we pay off our bills to retain that which we have borrowed making it real.

If as the ows crowd wants their education loans expunged because society owes them something

thus cheapens the entire education system and taints the work pool as these greedy people feel entitled without ever proving their worth.

To All, I am amazed how many think the so called money taken from us as taxes goes to any of the benefits given to people. Tax monies go to the bankers for interest on the fiat money from the very start of the non federal non reserve foreign banks. 100 so called dollars with 4 percent compound interest for thirty years is 220 so called dollars to pay back to the crooks. The game is divide and conquer.the white rose

So a question I can ask here, should you pay interest on loans?

Quoting: **Nobody in Particular**

This is a bit more difficult to wright, I'll keep it simple. 1000 years ago I'd borrow 5 silver pieces and pay you back a fee of one extra silver piece, totaling 6 silvers pieces for my "loan". This would be a short term loan with a fee rather than interest. We know that who I borrowed from made one piece of silver off me, no matter what the value of silver is at the time it still equaled 6 pieces of silver payed back . That's because Silver has a intrinsic value to it.

But this is where it gets sticky. Now a days I borrow \$10thousand in paper money from you for say 30 years. In 30 years what is really the value of the \$10k in fiat money? No one knows, inflations can do crazy things.

Example: A Harley was a thousand bucks in 1978 but by 1984 it was 3 grand for that same bike. That's a huge increase, so if I borrowed a grand from in 1978 for 5 years and even paid you back 20% interest for the life of the loan over those 5 years you just lost a lot of money just by making me that loan.

So is interest bad? I can't really answer that question! The question to me is really this: is borrowing money for VERY long periods of time a good thing? I'd have to say no, it is a very bad thing. Not only do you have the debt of the loan but your working in debt just to pay off the interest of the loan.

But you made the deal to take the loan, you signed the papers and you have no one to blame but

your self for what issues you get in to because of that contract you signed. Are up front fees on loans a better idea? Sure but they cant do that when were talking borrowing for 20+ years.

Stay out of debt is the real lesson, use your money to work for you not the other way around like 80% of the population. Don't let money burn a hole in your pocket, that is giving in to instant gratification which is fleeting at best.

In everything you do ask your self one question, what is the most I can loose if I make this deal. Will you find the risk will out weight the reward or will the reward out weight the risk?

OK that's all for now, I used the KISS method here and left a LOT out, but I don't want to overwhelm the post with details, enjoy.

~iSee~

again IS money necessary???? I agree leave the religion, except so many folks believe in money because of their religion, so that could be a reason behind convictions.

I will make a bold statement. MOney is not necessary. Maybe that will help here, on the convictions. Since it is NOT necessary, why do you hold to the conviction that it is?

Quoting: **Nobody in Particular**

Dude, in today's society as it is, money is very important. Personally I wish there was no money and we lived to make ourselves better.

I also believe the basics of Housing, Food, Electricity, Phone and Internet, etc should be available to everyone. If we didn't have this so called money we wouldn't be working against one another but work with.

Money is pure evil and causes nothing but trouble. Eventually we will ascend to a higher level where money isn't an issue and WE will learn to live together as one soon.

Just an opinion as asked :P

well I gave a friend who works in the office where I live some colloidal silver today. She is sick and needs to be in bed, and she has earned 11 badly needed hours of overtime this week, so she can use it on her sick car. She has not more sick time etc. Now if we didn't use money, this would NOT be an issue. While money is useful in growing societies to teach reason and planning, its time now for earth folks to give it up. We in a way need the earth changes, because its going to force cooperation in a whole different way, because there will not be enough money for what is coming.

Is money necessary?

Quoting: **Nobody in Particular**

The standard justification of money is that it's a medium of exchange and a store of value.

Current debt-based money is a rather weird store of value. We could do without that. It's effectively a bet (or a claim) on the productivity of other people. Clever, but a bit slave-like, no?

As a medium of exchange it is convenient. If an adequate system can exist without money though, we wouldn't miss it too much.

The cons are more serious than the pros. The cons are that, through financialization, some few people are able to put almost everyone else into enormous debt. Efficiency isn't worth that.

Quoting: **Anonymous Coward 573600**

yes being that our money system is created out of thin air and then interest charged on thin air money is a serious issue on this planet.

why do we need it as a medium of exchange? what are the disadvantages of that idea? Money has always been a big buga boo for me, even as a small child. It enslaved me, it was not a medium of exchange.

Quoting: **Nobody in Particular**

Could not agree more NIP, and funnily enough, I have felt PRECISELY the same way as you, since childhood!!!

That's probably why you are the only person on GLP that I have added to my buddy list :-)

Corruption is like a virus. There are so many people who start out good natured (sharing). Then are taught (usually at their jobs) to "sell" and overcome objections of others. This is a form of controlling other people. To be successful there is selling involved in almost any type of job.

I don't really like this about our world.

Quoting: **D'Light**

That's why I am a qualified 2 way electronics/radio technician (not that I have a job right now - have 2 bulging discs in my back, so I REFUSE to do any work right now... WAY TOO MUCH PAIN to concentrate and I am allergic to most pain killers). You do not have to sell anything, just have the knowledge to be able to fix a radio or 2 :-)

Further to that, I thoroughly enjoy fixing ALL SORTS of electronic equipment, just for the fact that I love doing it for people...

Case in point, I currently live in a caravan park (trailer park in your language), and there is a bloke who is slightly older than I am and he has handed me about 4 different electronic items to repair, only today he has offered me some dough to fix the latest device... I'm still wondering whether I should even take it from him, as he is on a government pension (not unemployment, disability). As far as I am concerned, to me personally money is a means to an end and nothing else.

I am unable to grow my own food, as I am unable to do any type of physical work whatsoever - 2 bulging discs, carpal tunnel in both hands, arterial tear in my right shoulder's ligaments and near enough no cartilage remaining in my left knee... Not to mention it is against the caravan parks rules to grow anything other than a tree here... Even if I could grow my own food here, there is also the rabbits that are all over the place, not to mention other people in the park would probably steal it and the park is being run like a jail, by the manager, he is nothing but a mongrel prick, who enjoys making life as difficult as possible for everyone concerned here...

So, I'm forced more or less to buy my food, not to mention having to buy my pain relieving/sleep inducing marijuana (a whole 3 grams a fortnight) - without which I am up the creek too....

So there ya go, I have little choice, but to use money... If I didn't suffer all the ailments, I would not smoke the green shit and I could grow my own food
